Supplements Vol. n.13 2008

Computational Astrophysics in Italy: results and perspectives

Rome, March 12, 2008

editors: Ugo Becciani

TABLE OF CONTENTS

<i>Index</i>	3
U. Becciani <i>Foreword</i>	6
<i>List of Participants</i>	8
U. Becciani <i>The Cometa Consortium and the PI2S2 project</i>	10
G. Bodo <i>Report on the INAF-CINECA agreement</i>	18
S. Borgani <i>Tracing the formation of cosmic structures with hydrodynamical simulations</i>	23
M. Comparato, U. Becciani <i>VisIVO Data exploration</i>	29
R. Capuzzo-Dolcetta, P. Miocchi <i>Galactic nuclei formation via globular cluster merging</i>	35
S. Landi, M. Velli <i>Tearing and velocity shear driven instabilities in the heliospheric plasmas: Three-dimensional simulations</i>	39
A.S. Bonomo, A.F. Lanza <i>Testing planetary transit detection methods with grid-based Monte-Carlo simulations</i>	46
G. Leto, P.A. Dybczyński, M. Jakubík, L. Neslušan, T. , Paulech <i>Dynamical evolution of comets during the first Gyr of the Solar System life</i>	52
M. Brescia, S. Cavuoti, G. d'Angelo, R. D'Abrusco, C. Donalek, N. Deniskina, O. Laurino, G. Longo <i>Astrophysics in S.Co.P.E.</i>	56

P. Manzato, M. Molinaro, F. Gasparo, F. Pasian, A. Pietrinferni, S. Ameglio, G. Murante, S. Borgani, S. Cassisi <i>Data Archiving: experience in the Theoretical Virtual Observatory</i>	62
A. Mignone <i>The PLUTO code for astrophysical gasdynamics</i>	67
M. Molinaro, P. Manzato, F. Gasparo, F. Pasian, S. Ameglio, G. Murante, S. Borgani <i>Preview, Explore and Analyze. Numerical Simulations inside the VO</i>	73
J.S. Morgan <i>Radio astronomy data reduction at the Institute of Radio Astronomy</i>	79
P. Natoli, M. Botti, G. de Gasperis, G. De Troia, F. Massaioli <i>The GLS approach to CMB map making</i>	84
P. Londrillo, C. Nipoti <i>N-MODY: a code for collisionless N-body simulations in modified Newtonian dynamics</i>	89
S. Orlando, F. Bocchino, M. Miceli, F. Reale, G. Peres <i>MHD Modeling of supernova remnants expanding through inhomogeneous interstellar medium</i>	97
P. Pagano, J.C. Raymond, F. Reale <i>Modeling magnetohydrodynamics and non-equilibrium SoHO/UVCS line emission of CME shocks</i>	104
L. Paioro, B. Garilli, P. Grosbøl, D. Tody, C. Surace, T. Fenouillet, P. Franzetti, M. Fumana, M. Scodeggio <i>The Future Astronomical Software Environment progress</i>	111
F. Pasian <i>(Super)computing within integrated e-Infrastructures</i>	117
F. Pasian, G. Peres, G. Longo <i>Round-Table Discussion</i>	125
I. Porceddu, N. D'Amico <i>The Cybersar project</i>	128
P. Rossi, G. Bodo, A. Mignone, S. Massaglia, A. Ferrari <i>Numerical simulations of accretion disks and astrophysical jets</i>	135
R. Scaramella, S. Sabatini <i>Finding LSBs from pixels</i>	142
G. Taffoni, C. Vuerli, F. Pasian <i>Making the Grid and the Virtual Observatory interoperable</i>	147

F.Vazza, G. Brunetti, C. Gheller <i>Cosmological shocks in Eulerian simulations: main properties and cosmic rays acceleration</i>	151
C. Vuerli, G. Taffoni, M. Sponza, F. Pasian <i>The Grid in INAF</i>	157
