

CO5BOLD workshop 2012*Heidelberg, October 1-3 2012**editors: E. Caffau and L. Sbordone***TABLE OF CONTENTS**

<i>Index</i>	3
<i>Foreword</i>	5
<i>Participants</i>	24
B. Freytag <i>Advances in the hydrodynamics solver of CO5BOLD</i>	26
M. Steffen, E. Caffau, and H.-G. Ludwig <i>Micro- and macroturbulence predictions from CO5BOLD 3D stellar atmospheres</i>	37
H.-G. Ludwig and M. Steffen <i>Opacities in CO5BOLD</i>	53
P.-E. Tremblay, H.-G. Ludwig, B. Freytag, and M. Steffen <i>Granulation in DA white dwarfs from CO5BOLD 3D model atmospheres</i>	61
A. Kučinskis, H.-G. Ludwig, M. Steffen, V. Dobrovolskas, J. Klevas, D. Prakashavičius, E. Caffau, and P. Bonifacio <i>The influence of convection on the atmospheric structures and observable properties of red giant stars</i>	68
J. Klevas, A. Kučinskis, H.-G. Ludwig, P. Bonifacio, M. Steffen, D. Prakashavičius <i>Spectral line asymmetries in the metal-poor red giant HD 122563: CO5BOLD predictions versus observations</i>	78
T.R. Ayres, J.R. Lyons, H.-G. Ludwig, E. Caffau, and S. Wedemeyer-Böhm <i>Solar carbon monoxide: poster child for 3D effects</i>	85
S. Wedemeyer <i>The CO5BOLD analysis tool</i>	96

O. Steiner, S.P. Rajaguru, G. Vigeesh, M. Steffen, W. Schaffenberger, and B. Freytag <i>First steps with CO5BOLD using HLLMHD and PP reconstruction</i>	100
B. Plez and A. Chiavassa <i>Red supergiant star studies with CO5BOLD and Optim3D</i>	105
D. Prakashavičius, M. Steffen, A. Kučinskas, H.-G. Ludwig, B. Freytag, E. Caffau, R. Cayrel <i>Oxygen spectral line synthesis: 3D non-LTE with CO5BOLD hydrodynamical model atmospheres</i>	111
L. Mashonkina, H.-G. Ludwig, A. Korn, T. Sitnova, and E. Caffau <i>Signs of atmospheric inhomogeneities in cool stars from 1D-NLTE analysis of iron lines</i>	120
F. Allard, D. Homeier, B. Freytag, W. Schaffenberger, and A. S. Rajpurohit <i>Progress in modeling very low mass stars, brown dwarfs, and planetary mass objects</i>	128
P. Bonifacio, E. Caffau, H.-G. Ludwig, M. Spite, B. Plez, M. Steffen, and F. Spite <i>Molecular bands in EMP stars. Granulation Effects</i>	138
