

**The structure of galaxy disks shaped by secular evolution  
and environmental processes**

Special session of EWASS 2012

*Rome, July 2, 2012*

*editors: P. Di Matteo, and C. J. Jog*

**TABLE OF CONTENTS**

<i>Index</i>	3
<i>Foreword</i>	5
<i>List of Participants</i>	7
<b>Session I: Radial and vertical structure of galaxy disks</b>	
M. Haywood <i>The structure and formation of the Milky Way disks</i>	11
J. H. Knapen and S. Comerón <i>Thick disks and secular evolution in disk galaxies</i>	17
J. Bakos and I. Trujillo <i>The outskirts of spiral galaxies: touching stellar halos at <math>z\sim 0</math> and <math>z\sim 1</math></i>	21
I. Martín-Navarro, I. Trujillo, J. Bakos and J. H. Knapen <i>Breaks and truncations: a unified picture for spiral galaxies.</i>	25
L. Morelli, E. M. Corsini, A. Pizzella, E. M. Dalla Bontà, L. Coccato, J. Méndez-Abreu and M. Cesetti <i>A Spectroscopic View of Stellar Populations in Bulges of Low Surface Brightness Galaxies</i>	29
S. dos Anjos and M. B. da Silva <i>Linking the Kinds of Bulges with Types of Arms Structures in Disks</i>	33
R. J. Diaz and H. Dottori <i>Kinematic decoupled cores: counter-rotation or just inner warp?</i>	37
M. Vika, S. Bamford, B. Häußler and A. Rojas <i>Multi-wavelength structural decomposition of nearby galaxies</i>	41

## Session II: Dark halos and gas in galaxy disks: distribution and impact on the stellar structure

F. Combes		
	<i>Dark matter distribution and its impact on the evolution of galaxy disks</i>	45
S. Khoperskov, A. Moiseev and A. Khoperskov		
	<i>Polar rings dynamics in the triaxial dark matter halo</i>	51
E. Jütte, J. van Eymeren, C.J. Jog, R.-J. Dettmar and Y. Stein		
	<i>Lopsidedness in disc galaxies</i>	55
M. D. Lehnert		
	<i>Distant Intense Starbursts: Evidence for Self-Regulated Star formation?</i>	59

## Session III: Secular evolution and environmental processes in galaxy disks

R. Roskar		
	<i>The Role of Radial Migration in Shaping the Stellar Populations of Spiral Galaxies</i>	64
A. Zasov, A. Saburova and I. Katkov		
	<i>Is dynamic heating of stellar disk inevitable?</i>	70
E. M. Corsini, J. Méndez-Abreu, R. Sánchez-Janssen, J. A. L. Aguerri and S. Zarattini		
	<i>The relation between bar formation, galaxy luminosity, and environment</i>	74
K. L. Masters and the Galaxy Zoo Team		
	<i>Revealing Galactic Scale Bars with the help of Galaxy Zoo and ALFALFA</i>	78
T. Melvin, K. L. Masters and the Galaxy Zoo Team		
	<i>Galaxy Zoo: Are we observing an epoch of bar formation in massive disk galaxies?</i>	82
M. C. Sánchez Gil, E. J. Alfaro and E. Pérez		
	<i>Corrugated velocity patterns in the spiral galaxies: NGC 278, NGC 1058, NGC 2500 &amp; UGC 3574</i>	86
O. Silchenko		
	<i>Old stellar disks and the origin of S0 galaxies</i>	93
