

MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA

Vol.7 2005

**5th Serbian Conference on spectral lines shapes in
astrophysics**

Vrsac, June 6-10, 2005

editors: L.Č.Popović and M.S.Dimitrijević

TABLE OF CONTENTS

<i>index</i>	3
<i>Foreword</i>	7
<i>List of Participants</i>	9
Spectral line phenomena in extragalactic objects	
A. P. Lobanov <i>Radio Spectroscopy of Active Galactic Nuclei</i>	12
S. Ciroi, V. Botte, P. Rafanelli, F., Di Mille, A. Romano <i>The Hidden Nature of Narrow Line Seyfert 1 Galaxies</i>	20
E.T. Chatzichristou <i>Multi-Wavelength Surveys of Obscured AGN</i>	26
D. Ilic, E. Bon, L. C. Popovic <i>Kinematics of the BLR and NLR in AGN Mrk 817</i>	30
E. Bon <i>The Disk Contribution To The Shape of The Balmer Broad Emission Lines in AGNs</i>	34
F. Di Mille, P. Rafanelli, S. Ciroi, V. L. Afanasiev, S. N. Dodonov, A. V. Moiseev <i>"Spectrophotometric study of nearby Seyfert nuclei</i>	38
A. A. Smirnova, A. V. Moiseev, V. L. Afanasiev <i>Studying of some Seyfert galaxies by means of panoramic spectroscopy</i>	40
Ph. Prugniel, I. Chilingarian L. C. Popovic <i>The history and dynamics of the stellar population in the central kpc of active galaxies</i>	42

A.V. Moiseev, V.L Afanasiev	
<i>Scanning Fabry-Perot interferometer in the extragalactic researches</i>	44
C. Abajas, E. Mediavilla, J.A. Munoz, L. C. Popovic	
<i>"Gravitational Microlensing Effects on the Broad Emission Lines of Quasars</i>	48
P. Jovanovic	
<i>Microlensing effect on Fe Kα line and X-ray continuum in the case of three gravitationally lensed quasars: MG J0414+0534, QSO 2237+0305 and H1413+117</i>	56
A.F. Zakharov, S.V. Repin	
<i>"Black Holes: Theory versus observations - Analysis of the Fe Kα and Precise Astrometrical Observations</i>	60
S.Samurovic	
<i>Detection of Dark Matter in Early-type Galaxies with X-ray Haloes using Absorption Spectral Lines</i>	68
S. Ninkovic	
<i>On the globular clusters of the Milky Way and the data obtainable from their spectra</i>	72
M. Krco, P.F. Goldsmith	
<i>HINSA as a Tool for Studying Dark Clouds and Star Formation</i>	78
Stellar and interstellar spectral lines	
I.J. Danziger	
<i>Line Profiles as Diagnostics in Supernova Envelopes</i>	82
E. Baron, P.H. Hauschildt	
<i>Overview of Supernova Modeling with PHOENIX</i>	86
M. Sachkov, T. Ryabchikova	
<i>Pulsations in the Atmospheres of Ap stars</i>	93
D. Shulyak, G. Valyavin, O. Kochukhov, S. Khan, V. Tsymbal	
<i>"Atmospheres of CP stars: magnetic field effects</i>	99
E. Danezis, D. Nikolaidis, E. Lyratzi, L. C. Popovic, M. S. Dimitrievic, E.Theodossiou, A. Antoniou	
<i>A new modeling approach for DACs and SACs regions in the atmospheres of hot emission stars</i>	107
E. Lyratzi, E. Danezis, D. Nikolaidis, L. C. Popovic, M. S. Dimitrijevic, E. Theodossiou	
<i>"A new approach for the structure of Hα regions in 120 Be-type stars</i>	114
Z. Simic	
<i>Influence of impacts with charged particles on Cd I and F III spectral lines in stellar plasma</i>	122

M. S. Dimitrijevic, T. Ryabchikova, L. C. Popovic, D. Shulyak, S. Khan <i>"On the influence of Stark broadening of Cr I lines in the Cr-rich Ap star β CrB atmosphere"</i>	126
N. Gavrilovic, S. Jankov, P. Mathias, P. De Cat <i>Investigation of rotational velocity of ϵ-Persei</i>	128
D. Korcakova, J. Kubat <i>Emergent Line Profiles From Rapidly Rotating Stars</i>	130
N. Milovanovic <i>The Stark Broadening Effect in Hot Star Atmospheres: Tl II</i>	132
M. Zboril <i>"Search for vertical helium abundance in He-rich star"</i>	136
P. Hauschildt, E. Baron <i>"Cool Stellar Atmospheres with PHOENIX"</i>	140
G. Peach, D. F. T. Mullamphy, V. Venturi, I. B. Whittingham <i>"Line shapes for the spectra of Brown Dwarfs"</i>	147
A. A. Mihajlov, Lj. M. Ignjatovic, M. S. Dimitrijevic <i>"Processes of Atom - Atom ($n - n'$)-mixing Influence on Hydrogen Atom Rydberg States Populations in Stellar Atmospheres"</i>	151
D. Homeier <i>Molecular Line Widths for Stellar Atmospheres</i>	158
O. Atanackovic-Vukmanovic <i>Solution of the NLTE line transfer problem by use of forth-and-back implicit Λ-iteration</i>	162
N. Vitas <i>Heights of formation of Mn I spectral lines broadened by hyperfine structure</i>	164
G. Djurasevic, D. Dimitrov, B. Arbutina, B. Albayrak, S. O. Selam <i>A study of close binary system EE Cet</i>	168
A. Lalovic, I. Vince <i>The reduction of eclipsing binary stars spectra observed at Rozhen Observatory</i>	170
Spectral lines in laboratory plasma	
Z. Petrovic, V. Stojanovic <i>Anomalous Doppler broadening of Hydrogen lines due to excitation by fast neutrals in low pressure Townsend discharges</i>	172
A. R. Ellingboe <i>Whistler Wave-Particle Interaction in a Temperate Ionosphere-like Plasma</i>	182

V. Milosavljevic”	
<i>Measured Stark shifts of Kr I line profiles in the 5s–5p and 5s–5p’ transitions</i>	192
M. D. Calzada	
<i>Spectroscopy of the discharges created and maintained by a surface-wave</i>	198
N. Ben Nesib	
<i>Interaction potentials for spectral line shapes in plasma</i>	209
H. Elabidi, N. Ben Nesib, M. S. Dimitrijevic	
<i>”Electron impact broadening of multicharged neon spectral lines</i>	213
W. F. Mahmoudi, N. Ben Nessib, M.S. Dimitrijevic, S. Sahal-Brechot	
<i>”Contribution to the Semi-Classical and Modified Semi-Empirical Impact Stark Broadening Calculations of Singly Ionized Carbon and Oxygen Spectral Lines</i>	217
N.M. Sakan, V.A. Sreckovic, A. A. Mihajlov	
<i>The application of the cut-off Coulomb potential for the calculation of a continuous spectra of dense hydrogen plasma</i>	221
M. Christova, V. Gagov, I. Koleva	
<i>Calculations of the collisional widths of several Ar I spectral lines</i>	225
R. Hamdi, N. Ben Nesib	
<i>Electric dipole transition probabilities in Al IV and Al V ions</i>	228
I. Santiago, M. Pineda, M.D. Calzada, M. Garcia	
<i>Voigt a-damping parameter of the spectral lines emitted by a plasma flame and a plasma column generated by a microwave at atmospheric pressure</i>	230
A. Sainz, M. D. Calzada, M. C. Garcia	
<i>Gas temperature from line broadening in a neon microwave plasma at atmospheric pressure</i>	232
A. Sainz, M. D. Calzada, M. C. Garcia	
<i>Self-absorption effects in the equivalent width of the spectral lines in a neon microwave plasma at atmospheric pressure</i>	234
Z. Simic, L. C. Popovic, M. S. Dimitrijevic, M. D. Dacic	
<i>Stark broadening parameters for Cu III and Zn III spectral lines</i>	236
M. Christova, M.S. Dimitrijevic, S. Sahal-Brechot	
<i>Stark broadening of Ar I spectral lines emitted in surface wave sustained discharges</i>	238
B. Zmerli, N. Ben Nesib, M. S. Dimitrijevic	
<i>Temperature dependance of non hydrogenic atom-lines Stark widths</i>	242
