Vol. 74, n. 1, 2003

IV NATIONAL CONFERENCE ON INFRARED ASTRONOMY

Perugia, December 4-7, 2001

editors: S. Ciprini, M. Busso, G. Tosti and P. Persi

TABLE OF CONTENTS

<i>Foreword</i>	11
<i>Participating Authorities</i>	13
<i>List of Participants</i>	14
Introduction	
P. Maffei <i>My Researches at the Infrared Doors</i>	19
Infrared Astronomy from Antarctica	
M. Candidi and A. Lori (invited talk) <i>Status of the Antarctic Base at Dome C and Perspectives for Astrophysics</i>	29
G. Tosti, M. Busso, S. Ciprini, P. Persi, M. Ferrari-Toniolo and L. Corcione (invited talk) <i>IRAIT: a Telescope for Infrared Astronomy from Antarctica</i>	37
F. Gasparoni, R. Chomicz, M. Zordan, and M. Dabalá (invited talk) <i>IRAIT Telescope and Enclosure: Engineering Aspects for Antarctic Operation</i>	45
L. Valenziano <i>Infrared and Millimetric Observing Sites: a Comparison</i>	53
L. Corcione, M. Busso, F. Porcu, M. Ferrari-Toniolo and P. Persi (invited talk) <i>Control System Architecture for Mid-Infrared Cameras: from TIRCAM2 to IRAIT</i>	57

- C.D. La Padula, A. Carusi, G.R. Lemaitre, P. Montiel, D. Nanni, G.B. Valsecchi, A. Vignato and R.F. Viotti
Wide-Field Astronomy at Dome C with a Compact Two-Mirror, Three-Reflection Telescope 63
- M. Ferrari-Toniolo
Future Perspectives for Antarctic Infrared Astronomy at Dome C 66
- S. Ciprini, M. Busso and G. Tosti
The Infrared Peak of the Blazar Spectral Energy Distribution and the Monitoring from Antarctica 70

Millimeter Astronomy from Antarctica and Atacama

- P. de Bernardis, P.A.R. Ade, J.J. Bock, J.R. Bond, J. Borrill, A. Boscaleri, K. Coble, C.R. Contaldi, B.P. Crill, G. De Troia, P. Ferreira, K. Ganga, M. Giacometti, E. Hivon, V.V. Hristov, A. Iacoangeli, A.H. Jaffe, W.C. Jones, A.E. Lange, L. Martinis, S. Masi, P. Mason, P.D. Mauskopf, A. Melchiorri, T. Montroy, F. Nati, C.B. Netterfield, E. Pascale, F. Piacentini, D. Pogosyan, G. Polenta, F. Pongetti, S. Prunet, G. Romeo, J.E. Ruhl, and F. Scaramuzzi (invited talk)
Investigating the Early Universe with the Cosmic Microwave Background Anisotropy 75
- G. Sironi, G. Boella, M. Gervasi, A. Tartari, and M. Zannoni (invited talk)
Observations at Millimetric and Sub Millimetric Wavelengths from Antarctica: Activity Report 85
- R. Cesaroni (invited talk)
The ALMA Project 89
- S. Masi, P. Ade, P. de Bernardis, A. Boscaleri, M. De Petris, G. De Troia, M. Fabrini, M. Giacometti, A. Iacoangeli, L. Lamagna, A. Lange, P. Lubin, P. Mauskopf, A. Melchiorri, F. Melchiorri, F. Nati, L. Nati, A. Orlando, E. Pascale, F. Piacentini, M. Pierre, G. Polenta, Y. Rephaeli, G. Romeo and D. Yvon
OLIMPO: A Few Arcmin Resolution Survey of the Sky at mm and Sub-mm Wavelengths 96

Ground-Based Infrared Astronomy

- F. Mannucci (invited talk)
Twenty Years of TIRGO Telescope 101
- E. Brocato and M. Dolci (invited talk)
The SWIRT Project at Campo Imperatore 110
- E. Oliva (invited talk)
NICS the Near Infrared Camera-Spectrometer of the TNG 118
- A. Richichi, A. Glindemann, P. Kervella, F. Paresce, M. Schöller, M. Tarenghi, and M. Wittkowski (invited talk)
Infrared Interferometry at the ESO VLTI 126

M. Gai, D. Bonino, L. Corcione, L. Delage, D. Gardiol, A. Gennai, M. G. Lattanzi, D. Loreggia, G. Massone, S. Menardi and F. Reynaud (invited talk) <i>Fringe Tracking for VLTI and LBT</i>	130
G. Chincarini and F.M. Zerbi (invited talk) <i>Gamma-Ray Bursts, Swift and REM</i>	138
P. Persi, A. R. Marenzi, M. Tapia and J. Bohigas (invited talk) <i>Mid-Infrared Images of Compact and Ultracompact HII Regions: W51 and W75N</i>	146
U. Munari and M. Fiorucci (invited talk) <i>The Asiago Database on Photometric Systems</i>	151
F. Bortoletto, M. DAlessandro, D. Fantinel, E. Giro, L. Corcione, G. Bonanno, P. Bruno, R. Cosentino, A. Carbone and G. Evola <i>A New Generation of Detector Controllers</i>	159
C. Baffa <i>The Fasti Project</i>	165
R. Nesci, S. Sclavi, M. Maesano, E. Massaro, M. Dolci, and F. D'Alessio <i>Simultaneous Optical-NIR Observations of Four BL Lacertae Objects</i>	169
M. Marengo, M. Karovska and Ž. Ivezić <i>An IR View of Mass Loss in Long Period Variables</i>	173
L. Origlia and R. M. Rich <i>High Resolution Infrared Spectra of Bulge Globular Clusters</i>	177
M. Bonamente <i>Extreme Ultra-violet and Soft X-ray Extinction by Dust in Clusters of Galaxies</i>	181
D. Lorenzetti, F. Cortecchia, F. DAlessio, A. Fiorani, G. Li Causi, D. Mancini, F. Perrotta, R. Scaramella, R. Speziali and F. Vitali (invited talk) <i>GOHSS: Current Status and Technical Aspects</i>	185
A. Fiorani and R. Scaramella <i>NIR Visibility Function of Galaxies with GOHSS</i>	189
A. Di Paola <i>The IR facility of Campo Imperatore</i>	193
F. Vitali, E. Cianci, V. Foglietti and D. Lorenzetti <i>Toward the Fabrication of Silicon Grisms for High Resolution Spectroscopy in the Near Infrared</i>	197
T. Giannini, F. Vitali, D. Lorenzetti and B. Nisini <i>ISAAC-VLT (2-5 μm) Observations of the IRS17 Protostellar Jet</i>	201
G. Corti, S. Risso, M. Busso, G. Silvestro and L. Corcione <i>Infrared Investigation from Earth and Space on the Evolutionary State of a Sample of LPV</i>	205

S. Risso, G. Corti, M. Busso, G. Silvestro, P. Maffei and G. Tosti <i>Mass Loss of Mira Stars Associated with a Star Formation Field in the M16 and M17 Region</i>	209
C. Spogli, M. Fiorucci, G. Tosti, G. Nucciarelli and G. Raimondo <i>Unidentified Extremely Red Objects in the Field of Some Dwarf Novae</i>	214
M. Missana <i>Numerical Studies of Laboratory Spectra</i>	218

Space-Borne Infrared Astronomy

G. Tofani and V. Natale (invited talk) <i>Herschel Space Observatory</i>	219
F. Villa, N. Mandolesi and R.C. Butler (invited talk) <i>The Planck Project</i>	223
M. Robberto (invited talk) <i>Infrared Astronomy with Hubble Space Telescope and the Next Generation Space Telescope</i>	230
F. Bortoletto, C. Bonoli, E. Giro, C. Pernechele, A. Franceschini, P. Conconi, R. Mazzoleni, E. Molinari and F. Zerbi (invited talk) <i>The Italian Participation to the NGST Mid-IR Instrumentation</i>	239
A. Cellino (invited talk) <i>The Observation of Near-Earth Objects from the Space at Thermal IR Wavelengths</i>	245
P. Saraceno, L. Spinoglio and S. Molinari (invited talk) <i>Star Formation from ISO to HERSCHEL</i>	253
E. Dotto and M.A. Barucci <i>Minor Bodies of the Solar System: ISO and ESO-VLT Infrared Spectroscopic Data</i>	262
A. Biviano, L. Metcalfe, B. Mc Breen, J.-P. Kneib, B. Altieri, M. Delaney, D. Elbaz, M. Kessler, K. Leech, K. Okumura, S. Ott and B. Schulz <i>Gravitational Lensing in the Infrared: the Faintest ISOCAM Sources</i>	266

IV NATIONAL CONFERENCE ON INFRARED ASTRONOMY

(IN HONOUR OF PAOLO MAFFEI)

Palazzo Manzoni, Facoltà di Lettere e Filosofia,
Università degli Studi di Perugia
Perugia, Italy, December 4-7, 2001

EDITED BY

Stefano Ciprini

Università di Perugia

Maurizio Busso

Università di Perugia

Gino Tosti

Università di Perugia

Paolo Persi

Istituto di Astrofisica Spaziale e Fisica Cosmica, CNR, Roma

SPONSORING INSTITUTIONS

Programma Nazionale di Ricerche in Antartide (PNRA)
Presidenza dell'Istituto Nazionale di Astrofisica (INAF)
INAF - Osservatorio Astronomico di Torino
Università degli Studi di Perugia
Società Astronomica Italiana

SCIENTIFIC ORGANIZING COMMITTEE

M. Busso (Co-chair - Università di Perugia)
A. Ferrari (INAF Consiglio Direttivo, e Università di Torino)
G. Mantovani (Università di Perugia, e Istituto Nazionale di Fisica Nucleare)
P. Persi (Co-chair - Istituto di Astrofisica Spaziale e Fisica Cosmica, CNR, Roma)
G. Tosti (Università di Perugia)

LOCAL ORGANIZING COMMITTEE

M. Bagaglia (Università di Perugia)
E. Berardi (Università di Perugia)
S. Ciprini (Università di Perugia)
G. Nucciarelli (Università di Perugia)

Collaborators:

N. Marchili (Università di Perugia)
M. Menguzzato (INAF Osservatorio Astronomico di Torino)
F. Porcu (INAF Osservatorio Astronomico di Torino)
M. Ragni (Università di Perugia)
A. Tramacere (Università di Perugia)

With the patronage of Regione Umbria

Convegno Nazionale di Astronomia Infrarossa
(in onore di Paolo Maffei)

Università degli Studi di Perugia
Palazzo Manzoni, Sala del Consiglio - Facoltà di Lettere e Filosofia
4-7 Dicembre 2001 Piazza Morlacchi - Perugia

Comitato Organizzatore:
M. Busso - Università di Perugia e INAF, (co-chair)
A. Ferrari - INAF e Università di Torino
G. Mantovani - Università di Perugia
P. Persi - IAS Roma, CNR, (co-chair)
G. Tosti - Università di Perugia

Enti patrocinatori:
Università di Perugia (Facoltà di Lettere e Filosofia - Facoltà di Scienze MM. FF. NN.)
INAF Istituto Nazionale per l'Astrofisica - Osservatorio Astronomico di Torino
SAIT Società Astronomica Italiana
PNRA Programma Nazionale di Ricerche in Antartide

astrolab1.fisica.unipg.it/congresso.htm

Programma

4 Dicembre: **Astronomia infrarossa in Antartide**
Astronomia millimetrica in Antartide e ad Atacama

5 Dicembre: **Astronomia infrarossa da Terra**
Cena Sociale

6 Dicembre: **Astronomia infrarossa da Terra - Continuazione**
Astronomia infrarossa, submillimetrica e millimetrica dallo Spazio

7 Dicembre: *Gita a Foligno e Montefalco*

Segreteria:
S. Ciprini, G. Tosti - Dipartimento di fisica
Università degli Studi di Perugia, via Pascoli, 06126 Perugia
tel: 075.5852742 - fax: 075.44666 Email: Stefano.Ciprini@pg.infn.it Gino.Tosti@fisica.unipg.it

Fig. 1. The Conference poster.

Fig. 2. Some moments of the Conference, held in the eighteenth-century *Manzoni Palace* of the Perugia University (Faculty of Literature and Philosophy).

In the cover: A particular of *l'Astronomia* (the Astronomy), the fresco of Gentile da Fabriano (1370-1427) from the Liberal Art Hall (or Hall of the Planets) of the *Trinci Palace* in the town of Foligno (Perugia, Italy). This Hall is so named because it contains frescos of *Trivium* and *Quadrivium* arts (Grammar, Dialectic, Music, Geometry, Philosophy, Astronomy, Arithmetic and Rhetoric) and frescos of the planets (seven: Moon, Mars, Mercury, Jupiter, Venus, Saturn and the Sun). They are related to the human ages (seven: Childhood, Puerility, Adolescence, Youth, Maturity, Senility, Decrepitude) and to the hours of the day. The frescos in the Hall of Planets represent, at an iconographic level, a *summa* of the Medioeval culture. Seven planets for seven human ages, each under the influence of a planet. The influence of each planet is different in different moments of the day, much like what happens in our life, in which we learn different disciplines at different ages. (Reproduced with permission of *Comune di Foligno*).

FOREWORD

Several years have passed since 1989, when the last national meeting fully dedicated to infrared astronomy was held in Gallipoli. Before then, there was a sort of agreement among the groups working in the field to remain in touch organizing, in turn, a workshop every three or four years as a chance to meet and discuss the common problems of a relatively restricted community, almost a club of amateurs.

In those days the complex procedures of infrared observations, the pioneer-like equipment, especially for exploiting mid-infrared bands, prevented most researchers from becoming fully familiar with the studies of cool matter in star formation regions and around evolved stars. What is normally defined as Infrared (i.e. researches at wavelengths between a few and around a hundred μm) was living as a separate island, detached not only from optical astronomy, but also from the work going on at millimeter wavelengths, preferentially sharing techniques and interests with radio astronomy.

A lot of things have happened since then. In Italy, immediately after the Gallipoli workshop, two projects started, which provided the first two national infrared cameras using bi-dimensional arrays: Arnica (for near infrared observations) and Tircam (for mid infrared wavelengths), both exploiting the possibilities of the national infrared telescope TIRGO, a remarkable piece of Occhialini's heritage. Abroad, infrared imaging started to grow as a common technique for providing information not to a selected community of peculiar old-fashioned experimental physicists, but to all astronomers interested in the reddened environments of our Galaxy and in distant objects well outside its limits. Quickly, modern instrumentation became available at Hawaii telescopes, in American and European observatories in Chile, then in several good, dry mountain astronomical sites. Finally, the preparation and launch of the ISO satellite definitely put an end to the era of the specialized, separate field of infrared astronomy; this last ceased to be an esoteric matter for *aficionados*, and grew simply as one of the many, powerful tools available to modern astronomical research.

These facts make clear why twelve years had to pass before a new Italian infrared meeting could take place: the need for a conference on a limited area became less obvious. They also explain the complexities of the material contained in this book, where the fascinating discussions of the Perugia workshop are reported. While speaking of infrared astronomy, we are now forced to deal with a lot of different but very integrated subjects, so strictly cross-correlated that the borders fade away; we are actually dealing with the whole astronomical research, simply looked at from a specific perspective.

It is important that, while we finally witness the complete integration of our research field in modern astronomy, we do not miss the links that have taken us so far, and the history behind all this. In Italy, an important part of this history is related to Paolo Maffei's name and to the pioneering lines of work he strongly suggested to pursue many years ago, when nobody believed in the possibilities of his techniques. Holding this workshop in Perugia, where he has been teaching for so many years, assumes therefore a peculiar meaning: that of a tribute from a mature scientific community to its origins. This community is today happy to gather for speaking of fascinating new instrumentation, both ground-based and space-borne, but also (and especially) to express its gratitude and its good wishes to Paolo, in the moment when he leaves active teaching.

In this respect, all of us want also to thank the Faculty of Sciences of the Perugia University and its dean, Prof. Mantovani, who have recently honored Paolo with the

title of *Professor Emeritus*, in an acknowledgement of his longstanding work to which we all associate. The University of Perugia has also decided that this work must be continued; and I am grateful to the *Magnifico Rettore* Prof. Bistoni, to the Faculty of Sciences and to the Department of Physics for the possibility I've been given to pursue Paolo's efforts in teaching and promoting Astrophysics in Perugia.

For the Organizing Committee
Maurizio Busso

Participating Authorities

★ **On. Prof. Gaia Grossi**

Assessore alla Ricerca, Politiche Formative, Politiche Attive del Lavoro e Politiche Sociali della Regione Umbria, e Università di Perugia
formazione@regione.umbria.it

★ **Prof. Giorgio Bonamente**

Preside della Facoltà di Lettere e Filosofia, Università di Perugia
preslet@unipg.it

★ **Prof. Giancarlo Mantovani**

Preside della Facoltà di Scienze Matematiche, Fisiche e Naturali, Università di Perugia, e Istituto Nazionale di Fisica Nucleare (INFN)
preside@pg.infn.it

★ **Prof. Attilio Ferrari**

Consiglio Direttivo dell'Istituto Nazionale di Astrofisica (INAF), e Università di Torino
ferrari@ph.unito.it

★ **Ing. Mario Zucchelli**

Capo Progetto Antartide ENEA, e Responsabile dell'Attuazione del Programma Nazionale di Ricerche in Antartide (PNRA)
mario.zucchelli@casaccia.enea.it

Prof. Giancarlo Setti (Presidente INAF, e Università di Bologna) and Prof. Carlo Alberto Ricci (Vice Presidente Commissione Scientifica Nazionale per l'Antartide, CSNA, e Università di Siena) could not attend, but were present with their written good wishes to our Conference and to Paolo Maffei.
