The 7th Torino Workshop on Nucleosynthesis in AGB Stars

Cambridge, August 2-6, 2004

editors: Richard J. Stancliffe, Maria A. Lugaro and Christopher A. Tout

TABLE OF CONTENTS

<i>Foreword</i>	572
<i>List of Participants</i>	576
Observations	
E. C. Wylie, P. L. Cottrell, K. M. Taute <i>Heavy element abundances in AGB stars. I. The hyades giant</i>	578
M. Reyniers, P. Deroo, H. Van Winckel, S. Goriely, L. Siess <i>s-process nucleosynthesis in very metal-deficient post-AGB stars</i>	584
S. Uttenthaler, B. Aringer, S. Höfner, J. Hron, H. U. Käufel, T. Lebzelter, W. Nowotny <i>Technetium in AGB stars: spectral synthesis and observations</i>	590
O. Zamora, C. Abia, P. de Laverny, I. Domínguez <i>An attempt to derive Mg isotopic ratios in carbon stars</i>	596
I. Domínguez, C. Abia, O. Straniero, S. Cristallo, Ya.V. Pavlenko <i>Draco 461, an intrinsic carbon star in a metal poor stellar population: 3^{er} dredge up and mixing</i>	601
C. Abia, P. de Laverny, I. Domínguez, O. Straniero, S. Cristallo, B. Plez <i>First chemical analysis of extragalactic carbon stars</i>	607
L. Sabin <i>The study of the carbon star IRC+10216</i>	612
R. Guandalini, S. Ciprini, M. Busso, G. Silvestro, P. Persi <i>Mass-losing AGB stars: infrared observations and evolutionary implications</i>	617
A. B. Verchovsky, I. P. Wright <i>Physical parameters of AGB winds derived from the implanted species in meteoritic SiC grains</i>	623

P. L. Cottrell, S. I. Barnes, M. D. Albrow, G. M. Kershaw <i>Status of SALT or What use is a large telescope for AGB science anyway?</i>	627
C. J. Ödman, R. G. Izzard <i>Stellardb: A Stellar Abundances Database</i>	631
Evolution	
C. A. Tout <i>Current mysteries of AGB stars</i>	637
J.C. Lattanzio <i>Trouble and Desire on the AGB</i>	643
M. Busso, M. C. Nucci, A. Chieffi, O. Straniero <i>Can extended mixing in red giants be attributed to magnetic mechanisms?</i>	648
P. Ventura <i>The role of convection in AGB modeling</i>	654
P. Lesaffre, C. A. Tout, R. J. Stancliffe, Ph. Podsiadlowski <i>A convective model consistent with chemistry</i>	660
O. Straniero, S. Cristallo, R. Gallino, I. Domínguez <i>Nucleosynthesis in very metal poor AGB stars</i>	665
R. J. Stancliffe, R. G. Izzard, C. A. Tout, O. R. Pols <i>Fully simultaneous calculations of AGB evolution</i>	670
S. Cristallo, O. Straniero, R. Gallino <i>A full network coupled to the evolutionary code: detailed s-process nucleosynthesis in low mass AGB Stars</i>	676
T. Decressin, C. Charbonnel, L. Siess, A. Palacios <i>Rotating models of low metallicity AGB stars with STAREVOL</i>	682
R. P. Church, C. A. Tout <i>Accelerating stellar evolution</i>	688
J. J. Eldridge, C. A. Tout <i>Exploring the Divisions and Overlap between AGB and Super-AGB Stars and Supernovae</i>	694
Nucleosynthesis	
R. Gallino, E. Arnone, M. Pignatari, O. Straniero <i>Post-AGB s-processed stars versus metallicity and their theoretical interpretation</i>	700
D. Delaude, R. Gallino, S. Cristallo, O. Straniero, L. Husti, S. Ryan <i>Lead and s-process elements in stars of various metallicities: AGB predictions and observations</i>	706

	571
C. Ugalde, J. Görres, M. Lugaro, M. Wiescher <i>Rates for reactions relevant to fluorine nucleosynthesis</i>	712
A. I. Karakas, M. Lugaro, C. Ugalde, M. Wiescher <i>The uncertainties in the $^{22}\text{Ne} + \alpha$-capture reactions and magnesium production in intermediate-mass AGB stars</i>	717
M. Lugaro, A. M. Davis, R. Gallino, M. R. Savina, M. J. Pellin <i>Constraints on AGB models from the heavy-element composition of presolar SiC grains</i>	723
M. Pignatari, R. Gallino, O. Straniero, A. Davis <i>The origin of the xenon trapped in presolar mainstream SiC grains</i>	729
S.W. Campbell, Y. Fenner, A.I. Karakas, J.C. Lattanzio, B.K. Gibson <i>Abundance anomalies in NGC 6752 - are AGB stars the culprits?</i>	735
S. Bisterzo, R. Gallino, M. Pignatari, L. Pompeia, K. Cunha, V. Smith <i>Cu and Zn in different stellar populations: inferring their origin</i>	741
AGB stars in binary systems	
O. Pols <i>Effects of binarity on asymptotic giant branch evolution</i>	749
R. G. Izzard <i>Duplicitous nucleosynthesis</i>	754
A.A. Bonačić Marinović, O.R. Pols <i>Barium star population synthesis with an improved TP-AGB model</i>	760
H. Van Winckel <i>Binary post-AGB stars</i>	766
S. Tsangarides, S. G. Ryan, T. C. Beers <i>On the binarity of carbon-enhanced, metal-poor stars</i>	772
