MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA

Vol.75 n.4 2004

The 7th Torino Workshop on Nucleosynthesis in AGB Stars

Cambridge, August 2-6, 2004

editors: Richard J. Stancliffe, Maria A. Lugaro and Christopher A. Tout

TABLE OF CONTENTS

Foreword 572

List of Participants 576

Observations

E. C. Wylie, P. L. Cottrell, K. M. Taute
Heavy element abundances in AGB stars. I. The hyades giant 578

M. Reyniers, P. Deroo, H. Van Winckel, S. Goriely, L. Siess
s-process nucleosynthesis in very metal-deficient post-AGB stars 584

S. Uttenthaler, B. Aringer, S. Höfner, J. Hron, H. U. Käufl, T. Lebzelter, W. Nowotny
Technetium in AGB stars: spectral synthesis and observations 590

O. Zamora, C. Abia, P. de Laverny, I. Domínguez
An attempt to derive Mg isotopic ratios in carbon stars 596

I. Domínguez, C. Abia, O. Straniero, S. Cristallo, Ya.V. Pavlenko
Draco 461, an intrinsic carbon star in a metal poor stellar population: 3er dredge up and mixing 601

C. Abia, P. de Laverny, I. Domínguez, O. Straniero, S. Cristallo, B. Plez
First chemical analysis of extragalactic carbon stars 607

L. Sabin
The study of the carbon star IRC+10216 612

R. Guandalini, S. Ciprini, M. Busso, G. Silvestro, P. Persi
Mass-losing AGB stars: infrared observations and evolutionary implications 617

A. B. Verchovsky, I. P. Wright
Physical parameters of AGB winds derived from the implanted species in meteoritic SiC grains 623

P. L. Cottrell, S. I. Barnes, M. D. Albrow, G. M. Kershaw
Status of SALT or What use is a large telescope for AGB science anyway? 627

C. J. Ödman, R. G. Izzard
Stellardb: A Stellar Abundances Database 631

Evolution

C. A. Tout
Current mysteries of AGB stars 637

J.C. Lattanzio
Trouble and Desire on the AGB 643

M. Busso, M. C. Nucci, A. Chieffi, O. Straniero
Can extended mixing in red giants be attributed to magnetic mechanisms? 648

P. Ventura
The role of convection in AGB modeling 654

P. Lesaffre, C. A. Tout, R. J. Stancliffe, Ph. Podsiadlowski
A convective model consistent with chemistry 660

O. Straniero, S. Cristallo, R. Gallino, I. Domínguez
Nucleosynthesis in very metal poor AGB stars 665

R. J. Stancliffe, R. G. Izzard, C. A. Tout, O. R. Pols
Fully simultaneous calculations of AGB evolution 670

S. Cristallo, O. Straniero, R. Gallino
A full network coupled to the evolutionary code: detailed s-process nucleosynthesis in low mass AGB Stars 676

T. Decressin, C. Charbonnel, L. Siess, A. Palacios
Rotating models of low metallicity AGB stars with STAREVOL 682

R. P. Church, C. A. Tout
Accelerating stellar evolution 688

J. J. Eldridge, C. A. Tout
Exploring the Divisions and Overlap between AGB and Super-AGB Stars and Supernovae 694

Nucleosynthesis

R. Gallino, E. Arnone, M. Pignatari, O.Straniero
Post-AGB s-processed stars versus metallicity and their theoretical interpretation 700

D. Delaude, R. Gallino, S. Cristallo, O. Straniero, L. Husti, S. Ryan
Lead and s-process elements in stars of various metallicities:AGB predictions and observations 706

C. Ugalde, J. Görres, M. Lugaro, M. Wiescher
Rates for reactions relevant to fluorine nucleosynthesis 712

A. I. Karakas, M. Lugaro, C. Ugalde, M. Wiescher
The uncertainties in the ^{22}Ne + α-capture reactions and magnesium production in intermediate-mass AGB stars 717

M. Lugaro, A. M. Davis, R. Gallino, M. R. Savina, M. J. Pellin
Constraints on AGB models from the heavy-element composition of presolar SiC grains 723

M. Pignatari, R. Gallino, O. Straniero, A. Davis
The origin of the xenon trapped in presolar mainstream SiC grains 729

S.W. Campbell, Y. Fenner, A.I. Karakas, J.C. Lattanzio, B.K. Gibson
Abundance anomalies in NGC 6752 - are AGB stars the culprits? 735

S. Bisterzo, R. Gallino, M. Pignatari, L. Pompeia, K. Cunha, V. Smith
Cu and Zn in different stellar populations: inferring their origin 741

AGB stars in binary systems

O. Pols
Effects of binarity on asymptotic giant branch evolution 749

R. G. Izzard
Duplicitous nucleosynthesis 754

A.A. Bonačić Marinović, O.R. Pols
Barium star population synthesis with an improved TP-AGB model 760

H. Van Winckel
Binary post-AGB stars 766

S. Tsangarides, S. G. Ryan, T. C. Beers
On the binarity of carbon-enhanced, metal-poor stars 772
