# MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA

Vol. 76 n. 4 2005

**Solar Variability and Earth’s climate**

*Monte Porzio Catone, June 27 - July 1, 2005*

*editors: Ilaria Ermolli, Judit Pap and Peter Fox*

## TABLE OF CONTENTS

<table>

</table>

**Session I: Solar Radiation and Climate Records - Status and Current Measurements**

- **M. P. Rast**  
  *Solar variability: a brief review*  
  (719)

- **C. Fröhlich**  
  *Solar irradiance variability since 1978: revision of the PMOD composite during Solar Cycle 21*  
  (731)

- **J. Harder, J. Fontenla, O. White, G. Rottman and T. Woods**  
  *Solar spectral irradiance variability comparisons of the SORCE SIM instrument with monitors of solar activity and spectral synthesis*  
  (735)

- **A. G. Kosovichev**  
  *Sun’s Global Property Measurements: helioseismic probing of solar variability*  
  (743)

- **J. Beer**  
  *Solar variability and climate change*  
  (751)

- **A. Mangini**  
  *Assessing the variability of precipitation during the Holocene from stalagmite records*  
  (755)

- **O. Raspopov, V. Dergachev, O. Kozyreva, and T. Kolström**  
  *Climate response on de Vries solar cycles: evidence from Juniperus turkestanica tree-rings in Central Asia*  
  (760)
Session II: Mechanisms and Physical models for Irradiance Variations
C. J. Schrijver  
*Solar and stellar variability*  
766

S. Sofia and L. H. Li  
*Mechanisms for global solar variability*  
768

D. Schmitt  
*Origin of solar magnetic variability*  
773

S. K. Solanki and M. Schussler  
*Mechanisms of secular magnetic field variations*  
781

O. Steiner and A. Ferriz-Mas  
*The deep roots of radiance variability*  
789

Session III: Mechanisms and Physical models for Climate Variations
E. Zorita and H. von Storch  
*Methodical aspects of reconstructing non-local historical temperatures*  
794

C. Amman  
*Solar signal in records and simulations of past climate*  
802

C. Field, G. A. Schmidt and D. Koch  
*Solar and climatic effects on $^{10}$Be*  
805

U. Cubasch, G. Bürger, I. Fast, Th. Spangehl and S. Wagner  
*The direct solar influence on climate: modeling the lower atmosphere*  
810

Session IV: Modelling of Solar Irradiance Variations
S. R. Walton  
*Modeling total solar irradiance: the data, the models, the questions*  
819

J. Fontenla and G. Harder  
*Physical modeling of spectral irradiance*  
826

N. Krivova and S. K. Solanki  
*Modelling of irradiance variations through atmosphere models*  
834

A. Vögler  
*On the effect of photospheric magnetic fields on solar surface brightness: results of radiative MHD simulations*  
842

J. Morrill  
*Calculating solar UV spectral irradiance using observed spectral radiance and full disk Ca II K images*  
850

V. Penza, E. Pietropaolo and W. Livingston  
*Study of photospheric line depth variations along the solar cycle*  
856
S. Lefebvre, R. K. Ulrich, L. S. Webster, F. Varadi, J. Jawaraiah, L. Bertello, L. Werden, 
J. E. Boyden and P. Gilman

*The solar photograph archive of the Mount Wilson Observatory: A resource for a
century of digital data*

**Session V: Mechanisms and Physical Models for Climate Variations: Coupling
of the Middle and Lower atmosphere**

U. Langematz, K. Matthes and J. L. Grenfell

*Solar impact on climate: modeling the coupling between the middle and the lower
atmosphere*

*Solar signal in atmospheric ozone, temperature and dynamics simulated with CCM
SOCOL in transient mode*

K. Coughlin, Ka-Kit Tung and D. Camp

*Tropical versus extratropical changes related to solar flux variations*

**Session VI: Sun-Earth Connections**

A. Meloni, P. De Michelis and R. Tozzi

*Geomagnetic storms, dependence on solar and interplanetary phenomena: a re-
view*

U. Villante, M. De Lauretis, P. Francia, M. Vellante and A. Piancatelli

*Solar wind-magnetosphere interaction as observed in the geomagnetic field varia-
tions in the polar regions*

O. Troshichev, L. Egorova, A. Janzhura and V. Vovk

*Influence of the disturbed solar wind on atmospheric processes in Antarctica and
El-Nino Southern Oscillation (ENSO)*

M. Vellante and M. Förster

*Dependence of geomagnetic field line resonant frequencies on solar irradiance*

**Session VII: Perspective and Future Developments of Sun-Climate Research**

G. Thuillier

*Status of solar global properties measurements: PICARD mission*

P. N. Bernasconi, P. Foukal, D. M. Rust and B. J. LaBonte

*Finding the sources of solar irradiance at sunspot minimum*

**Closing remarks**

P. Brekke

*Closing remarks on the Sun influence on climate change*
Poster Session

L. Alfonsi, G. de Franceschi, M. Lester, C. N. Mitchell, V. Romano, P. Spalla and P. Yin
A network for upper atmosphere monitoring at high latitudes of the northern hemisphere

Y.M. Almleaky, M.A. Sharaf, H.M. Basurah, A.A. Malawi and Z.A. Al-Mostafa
Temperature increasing trend due to solar activity at Western Saudi

Z. A. Al-Mostafa
Calculation of sky turbidity in the Kingdom of Saudi Arabia

L. Balmaceda, S. K. Solanki and N. Krivova
A cross-calibrated sunspot areas time series since 1874

I. Baumann and M. Schüssler
A necessary extension of the surface flux transport model

Y. Calisesi, K. Hocke and N. Kämpfer
The natural variability of stratospheric and mesospheric ozone as observed over Switzerland by a ground-based microwave remote sensor

M. Centrone, I. Ermolli and F. Giorgi
Image processing for the Arcetri Solar Archive

S. Criscuoli and M. P. Rast
A study of the photometrical properties of solar magnetic features by numerical simulation

S. Danilovic and I. Vince
Variability of the Mn I 539.4 nm solar spectral line parameters with solar activity

G. Del Zanna, V. Andretta and A. Beaussier
The EUV spectral irradiance from 1996 to 2003 as obtained from SOHO

P. De Michelis, R. Tozzi and A. Meloni
Geomagnetic jerks” observation and theoretical modeling

Z. Fazel, J. P. Rozelot, S. Pireaux, A. Ajabshirizadeh and S. Lefebvre
Solar irradiance, luminosity and photospheric effective temperature

K. Georgieva, B. Kirov and C. Bianchi
Long-term variations in the correlation between solar activity and climate

K. Georgieva, C. Bianchi and B. Kirov
Once again about global warming and solar activity

S. Giordano, F. Berrilli and D. Del Moro
High resolution observations of chromospheric network

F. Giorgi, I. Ermolli, M. Centrone and E. Marchei
Calibration of the Arcetri Solar Archive Images
L. Győrő, T. Baranyi, J. Muraközy and A. Ludmány
*Recent advances in the Debrecen sunspot catalogues*

L. Győrő, T. Baranyi, J. Muraközy and A. Ludmány
*Comparison of sunspot area data determined from ground-based and space-borne observation*

A. Kilcik, O. Golbasi, H. Kilic, V. Ozkan and A.Y. Yuceer
*Usability of solar radius variations as an indicator of solar activity and influence on climate*

S. Lefebvre, J. P. Rozelot, S. Pireaux, A. Ajabshirizadeh and Z. Fazel
*Global properties of Sun and stars” what can we learn from irradiance and shape?*

S. Lepidi, L. Santarelli, L. Cafarella and P. Palangio
*The Earth’s passage of coronal mass ejecta on October 29-31, 2003: ULF geomagnetic field fluctuations at very high latitude*

P. Mauas and E. Flamenco
*Solar activity and the streamflow of the Paraná River*

G. Mezo and T. Baranyi
*HTML presentation of the Debrecen Photoheliographic Data sunspot catalogue*

G. Muscari, M. Pezzopane, V. Romaniello, R.L. de Zafra, C. Bianchi and G. Fiocco
*On the potential impact of large electron concentrations on mesospheric ozone*

S. Naitamor
*Coronal Mass Ejection: theirs sources and geomagnetic disturbances*

A. Nigro, A. Pagano and F. Zuccarello
*Global warming: solar variability and energy consumption*

A. Ortiz and M. Rast
*How good is the Ca II K as a proxy for the magnetic flux?*

C. Perna
*SAMOA Solar and Atmospheric Measurements and Observations Archive*

D. I. Ponyavin, T. V. Barliaeva and N. V. Zolotova
*Hypersensitivity of climate response to solar activity output during the last 60 years*

M. S. Quassim and A. F. Attia
*Forecasting the global temperature trend according to the predicted solar activity during the next decades*

J. L. R. Saba, K. T. Strong, and G. L. Slater
*Can we predict when the next solar cycle is about to take off?*

*GOME and SCIAMACHY solar measurements: solar spectral irradiance and Mg II solar activity proxy indicator*
P. Stoeva and A. Stoev  
*Cave air temperature response to climate and solar and geomagnetic activity*  
1042

C. Taricco and S. Alessio  
*Decadal and centennial cycles revealed in two climate isotopic*  
1048

E. S. Vernova, M. I. Tyasto and D. G. Baranov  
*Solar magnetic cycle and longitudinal distribution of solar activity*  
1052

I.S. Veselovsky  
*Similarity and diversity of solar extreme events*  
1056

U. Villante, A. Nubile, P. Di Giuseppe, P. Francia and M. Vellante  
*ULF oscillations at discrete frequencies: a comparison between ground, magnetospheric and interplanetary measurements*  
1060

N. Vitas and I. Vince  
*NLTE Effects in formation of variable Mn I 539.4 nm line in solar spectrum*  
1064

B. Viticchié, D. Del Moro, F. Berrilli and A. Egidi  
*Magnetic reconnection driven by a synthetic photospheric velocity field*  
1068

V.V. Zharkova, S.I. Zharkov and A.K. Benkhalil  
*North-South asymmetry in the solar cycle 23 extracted from the Solar Feature Catalogues*  
1072

G. Zherebtsov, V. Kovalenko and S. Molodykh  
*The effect of solar activity on the Earth’s climate changes*  
1076
