

**The central kiloparsec:**

Active Galactic Nuclei and their hosts

*Ierapetra, Crete, Greece, June 4-6, 2008*

*editors:* Andrei Lobanov, Emmanouil Angelakis, Manel Perucho Pla

**TABLE OF CONTENTS**

<i>Foreword</i>	995
<i>List of participants</i>	998
<b>Session 1: A synthetic picture of active galactic nuclei</b>	
J. Krolik <i>AGN: The central kiloparsec</i>	1003
T. Courvoisier <i>A synthetic picture of AGN</i>	1011
S. Buttiglione <i>Optical spectroscopy of 3CR sample of radio sources at <math>z &lt; 0.3</math></i>	1018
T.G. Arshakian, J. León-Tavares, A.P. Lobanov, V.H. Chavushyan, L. Popovic, A.I. Shapovalova, A. Burenkov, and J.A. Zensus <i>Jet-BLR connection in 3C390.3</i>	1022
M. Filho <i>Phase closure image reconstruction for infrared interferometry</i>	1030
C. Ramos Almeida, J.M. Rodríguez Espinosa, G. Barro, J. Gallego, and P.G. Pérez-González <i>Spectral energy distributions of a hard X-ray selected AGN Sample in the EGS</i>	1034
E. Angelakis, M. Kadler, K. Lewis, R.M. Sambruna, M. Eracleous, and J.A. Zensus <i>Radio spectra of intermediate-luminosity broad-line radio galaxies</i>	1038
E. Angelakis, L. Fuhrmann, N. Marchili, T.P. Krichbaum and J.A. Zensus <i>Monitoring the radio spectra of selected blazars in the Fermi-GST era</i>	1042
<b>Session 2: Vicinity of supermassive black holes</b>	

M. Camenzind		
<i>Vicinity of supermassive black holes</i>		1046
M. Zamaninasab, A. Eckart, D. Kunneriath, G. Witzel, R. Schödel, L. Meyer, M. Dovciak, V. Karas, S. König, T. Krichbaum, R.S. Lu, C. Straubmeier, and J.A. Zensus		
<i>Flares of Sgr A*: from X-ray to mm</i>		1054
M. Georganopoulos, Demosthenes Kazanas, Eric S. Perlman		
<i>A simple diagnostic for the location of the blazar emission site</i>		1058
A.P. Lobanov		
<i>Vicinity of SMBH probed by high-resolution radio observations</i>		1062
<b>Session 3: Accretion: disks and inflows</b>		
A. King		
<i>Accretion in AGN: evolution of black hole mass and spin</i>		1066
L. Subr		
<i>SMBH feeding and star formation in massive accretion discs</i>		1071
I. Gavignaud, L. Wistozki, A. Bongiorno, S. Paltani, G. Zamorani, P. Møller, and VVDS Team		
<i>Eddington ratios of faint AGN at intermediate redshifts</i>		1075
S. Silich, F. Hueyotl-Zahuantitla, and G. Tenorio-Tagle		
<i>SMBH spherically symmetric accretion regulated by violent star formation feedback</i>		1079
<b>Session 4: Stars and gas in the nuclear region</b>		
H. Netzer		
<i>Gas, dust and starburst in the central kpc of Active Galactic Nuclei</i>		1083
C.M. Gaskell, R.W. Goosmann, and E.S. Klimek		
<i>Structure and kinematics of the broad-line region and torus of Active Galactic Nuclei</i>		1090
C. Struve, R. Morganti, and T.A. Oosterloo		
<i>Circumnuclear HI disks in radio galaxies</i>		1096
H. Perets, A. Gualandris, D. Merritt, and T. Alexander		
<i>Dynamical evolution of the young stars in the Galactic center</i>		1100
D. Ilić, L.Č. Popović, J. León-Tavares, A.P. Lobanov, A.I. Shapovalova, and V.H. Chavushyan		
<i>The broad line region in Mrk 668 and NGC 4151: an outflow model</i>		1105
S. Harfst, A. Gualandris, D. Merritt, and S. Mikkola		
<i>Orbits of stars in the central parsec</i>		1109

S.J. Curran, M.T. Whiting, and J.K. Webb <i>Where is cold neutral gas in the hosts of high redshift AGN?</i>	1113
N. Maddox and P.C. Hewett <i>Investigating broad absorption line quasars with SDSS and UKIDSS</i>	1117
C. Rodriguez, W.M. Goss, J.L. Turner, and Y. Gómez <i>VLA observations of the H53<math>\alpha</math> recombination line toward the super star clusters galaxy NGC 5253</i>	1121
<b>Session 5: Disk-outflow connection and molecular dusty torus</b>	
M. Elitzur <i>Disk-outflow connection and the molecular dusty torus</i>	1124
M. Schartmann, K. Meisenheimer, H. Klahr, M. Camenzind, S.Wolf, Th.Henning <i>Turbulent AGN tori</i>	1132
F.P. Israel <i>Physical conditions of molecular gas in spiral galaxy centers</i>	1136
C.L. Buchanan, J.F. Gallimore, C.P. O'Dea, S.A. Baum, D.J. Axon, A. Robinson, J. Noel-Storr, A.Yzaguirre, and M. Elitzur <i>Unveiling the nature of Seyfert galaxies with 1-100 micron spectral energy distributions</i>	1140
K.R.W. Tristram, D. Raban, L. Burtscher, K. Meisenheimer, and W.J. Jaffe <i>Resolving the dusty cores of nearby AGN with mid infrared interferometry</i>	1144
<b>Session 6: Relativistic jets and the nuclear region</b>	
N. Vlahakis <i>Relativistic jets and the nuclear region in AGN</i>	1148
Y.Y. Kovalev, A.P. Lobanov, and A.B. Pushkarev <i>Physics of central several parsecs in the quasar 0850+581</i>	1153
J.L. Gómez, I. Agudo, A.P. Marscher, and S. Jorstad <i>Stratification in polarization and Faraday rotation in the jet of 3C 120</i>	1157
M.G.H. Krause <i>Jets and multi-phase turbulence</i>	1162
M. Perucho, I. Agudo, J.L. Gómez, M. Kadler, E. Ros, and Y.Y. Kovalev <i>Hydrodynamics of a perturbation in the jet of 3C 111</i>	1166
A.B. Pushkarev, Y.Y. Kovalev, and A.P. Lobanov <i>Testing adiabatic expansion of shocks in parsec-scale jets by dual-frequency VLBI experiments</i>	1170
M. Roca-Sogorb, M. Perucho, J.L. Gómez, J.M. Martí, L. Antón, M.A. Aloy, and I. Agudo <i>Helical magnetic field effects in relativistic jets</i>	1174

**Session 7: AGN feedback**

- F. Nicastro, Y. Krongold, and M. Elvis  
*The X-ray view of AGN ionized outflows* 1178
- E. Koulouridis, V.H. Chavushyan, M. Plionis, D. Dultzin, Y. Krongold, C. Goudis, and E. Chatzichristou  
*The environment of Sy1, Sy2 & bright IRAS galaxies: the AGN/starburst connection* 1185
- P. Barai, J. Germain, and H. Martel  
*Anisotropic AGN outflows filling the cosmological volume* 1189
- M. Imanishi  
*Luminous buried AGNs in luminous IR galaxies and the origin of galaxy downsizing* 1193
- J.M. Ramirez  
*X-ray physical properties of the quasar APM 08279+5255* 1197
- C.A. Caretta, J.M. Islas-Islas, J.P. Torres-Papaqui, R. Coziol, H. Bravo-Alfaro, and H. Andernach  
*Galaxy activity influenced by the environment in the cluster of galaxies Abell 85* 1201

**Session 8: Sub-relativistic outflows and extended regions**

- C. Tadhunter  
*The importance of sub-relativistic outflows in AGN host galaxies* 1205
- D. Axon, A. Robinson, S. Young, J.E. Smith, and J.H. Hough  
*AGN disks and winds: a new understanding from spectropolarimetry* 1213
- D.J. Rosario, W. Whittle, C.H. Nelson, and A.S. Wilson  
*Radio-jet driven outflows in Seyfert galaxies* 1217
- F.M. Montenegro-Montes, K.-H. Mack, M. Vigotti, C.R. Benn, R. Carballo, J.I. González-Serrano, J. Holt, and F. Jiménez-Luján  
*Compact radio-loud Broad Absorption Line Quasars* 1221
- A. Ruff  
*A Quasar Wind Model* 1225
- B. Husemann, L. Wisotzki, S.F. Sánchez, K. Jahnke  
*Integral field spectroscopy of low-z QSOs and Seyfert galaxies* 1227

**Session 9: SMBH and their galactic hosts**

- M. Volonteri, S. Callegari, M. Colpi, M. Dotti, and L. Mayer  
*Massive black holes and their hosts* 1231
- D. Batcheldor  
*The  $M_{\bullet}$ - $\sigma$  project* 1239

A. Marconi, D. Axon, R. Miolino, T. Nagao, P. Pietrini, A. Robinson, G. Torricelli <i>Weighing black holes from zero to high redshift</i>	1243
N. Bennert <i>Fueling QSOs: the relevance of mergers</i>	1247
Y. Letawe, P. Magain, G. Letawe, F. Courbin, and D. Hutsemékers <i>Study of the QSO HE0354-5500 with combined HST imaging and VLT spectroscopy</i>	1251
N. Nowak, R.P. Saglia, J. Thomas, P. Erwin, and R. Bender <i>Black holes in low-mass bulges and pseudobulges</i>	1255
S. Chi, M.A. Garrett, and P.D. Barthel <i>AGN and starbursts in the HDF-N and HFF: Deep, global VLBI observations</i>	1259
F. Panessa and M. Giroletti <i>The X-ray and radio connection in nearby Seyfert galaxies</i>	1263
A. Bongiorno, M. Mignoli, G. Zamorani, F. Lamareille, and T. Contini <i>Optically selected type-2 AGN: preliminary results from the COSMOS survey</i>	1267
D.J.E. Floyd, N.F. Bate, and R.L. Webster <i>Probing the emitting region using anomalous lensed QSOs</i>	1271
S. Tommasin, L. Spinoglio, K. Hainline, M.A. Malkan, and H. Smoth <i>Seyfert galaxies in the local Universe: analysis of Spitzer spectra of a complete sample</i>	1275
F. Marulli, S. Bonoli, E. Branchini, L. Moscardini, and V. Springel <i>The cosmological co-evolution of supermassive black holes, AGN and galaxies</i>	1279
<b>Session 10: Binary supermassive black holes in AGN</b>	
L. Mayer, S. Kazantzidis, and A. Escala <i>Formation of nuclear disks and supermassive black hole binaries in multi-scale hydrodynamical galaxy mergers</i>	1284
M. Dotti, M. Colpi, F. Haardt, and L. Mayer <i>Massive black hole binaries in gaseous nuclear discs</i>	1294
D.V. Lal, M.J. Hardcastle, R.P. Kraft, C.C. Cheung, A.P. Lobanov, J.A. Zensus, S. Bhatnagar, and A.P. Rao <i>Nature of X-shaped sources</i>	1298
S. Callegari, L. Mayer and S. Kazantzidis <i>Pairing of supermassive black holes in unequal-mass mergers</i>	1302
A.P. Lobanov <i>Binary supermassive black holes driving the nuclear activity in galaxies</i>	1306

**Session 11: Co-evolution of SMBH and AGN**

- A. Merloni  
*Cosmological evolution of supermassive black holes and AGN: a synthesis model for accretion and feedback* 1310
- A. Schulze and L. Wisotzki  
*The mass function of local active black holes* 1318
- G. Lodato  
*Formation and evolution of massive black hole seeds at high redshift* 1322
- D. Dultzin, J.J. Gonzales, Y. Krongold, H. Hernández-Toledo, E.M. Huerta, I. Cruz-González, L. Olguín, P. Marziani, and F. Hernández-Ibarra  
*Activity induced by gravitational interaction in galaxy pairs* 1326
- T. Courvoisier  
*Conference summary* 1330
