EURO-VO Data Centre Alliance workshop: Theory in the Virtual Observatory

Garching, April 07-09, 2008

editors: G. Lemson, J. Zuther, and J. W. Kim

TABLE OF CONTENTS

Index 333

Index 335

Foreword 337

List of participants 340

Session I: Introduction

G. Lemson J. Zuther
Theory in the Virtual Observatory 342

M. Allen
Science in the Virtual Observatory 352

Session II: 3D+1 Simulations

H. Wozniak
The HORIZON Project 357

R. Wagner
A RESTful Catalog for Simulations 365

M. Molinaro et al.
Italian Theoretical Virtual Observatory(ITVO): Cosmological Simulations in the VO frame 373

Session III: Micro-simulations

S. Cassisi et al.
Stellar evolution@EURO-VObs 377

M. Salaris et al.
Population synthesis models and the VO 387

C. Morisset
The Mexican Million Models Database: a virtual observatory for gaseous nebulae 397

C. Rodrigo Blanco E. Solano
Theoretical models access with a TSAP-like protocol 402

P. Manzato
ITVO and BaSTI: Databases and Services for Cosmological and Stellar models 408

Session IV: Theory-theory interoperability

I. Iliev
Cosmological Radiative Transfer Comparison Project 415

Session V: Theory-observational interface

E. Bertin
SkyMaker: astronomical image simulations made easy 422

B. Panter
Matching Data and Models in the Virtual Observatory 429

A. Finoguenov J. W. Kim
Introduction to MAXI, the Multivariate Archive of X-ray Images 435

Session VI: Computational infrastructure and Theory V0

G. Caniglia et al.
VisIVO:Data Exporation of Complex Data 441
