

The 10th Torino Workshop on AGB star nucleosynthesis:

from Rutherford to Beatrice Tinsley and beyond

Christchurch, New Zealand, January 25–29, 2010

editors: C. C. Worley, C. A. Tout and R. J. Stancliffe

TABLE OF CONTENTS

<i>Index</i>	941
<i>Foreword</i>	944
<i>List of Participants</i>	947
Introduction	
P. L. Cottrell <i>Rutherford and Tinsley: the beginning and middle of nucleosynthesis at the University of Canterbury</i>	949
Session I: Chemical composition on the AGB	
G. Wallerstein and W. Huang <i>The composition of RR Lyrae stars: start–line for the AGB</i>	952
J. Buntain, M. Lugaro, R. J. Stancliffe, A. Karakas, L. Nittler, and P. Hope <i>Wind composition beyond the tip of the AGB and its relevance to stardust grains</i>	958
Session II: Chemical evolution from the AGB	
C. Kobayashi <i>Chemo–dynamical simulations of galaxies</i>	964
A. Chieffi and M. Limongi <i>On the nature of the thermal pulses on the Asymptotic Giant Branch</i>	970
Session III: Super–Asymptotic Giant Branch stars (SAGB)	
P. Gil–Pons and C. L. Doherty <i>The upper mass limit for the formation of TP–SAGB stars and the dredge–out phenomenon</i>	974

- L. Siess
Super-AGB yields 980

Session IV: Nucleosynthesis in stellar interiors

- C. Abia, K. Cunha, S. Cristallo, P. de Laverny, I. Domínguez, K. Eriksson, L. Gialanella, K. Hinkle, G. Imbriani, A. Recio-Blanco, V. V. Smith, O. Straniero, and R. Wahlin
Is the fluorine abundance problem in AGB stars solved? 986
- M. Mollá and M. Gavilán
Some caveats on the evolution of the N/O abundance and the star formation history 992
- R. Gallino, S. Bisterzo, S. Cristallo, and O. Straniero
The role of primary ^{16}O as a neutron poison in AGB stars and fluorine primary production at halo metallicities 998

Session V: Chemical evolution in Globular Clusters

- S. W. Campbell, D. Yong, E. C. Wylie de Boer, R. J. Stancliffe, J. C. Lattanzio, G. C. Angelou, F. Grundahl, and C. Sneden
The case of the disappearing CN-strong AGB stars in galactic Globular Clusters – preliminary results 1004
- A. I. Karakas, S. W. Campbell, M. Lugaro, D. Yong, and A. Chieffi
The origin of the heavy elements in stars in the Globular Clusters M4 and M5 1010
- C. C. Worley and P. L. Cottrell
Neutron-capture element abundances of luminous giant stars in the Globular Clusters 47 Tuc, NGC 6388 and NGC 362 1016

Session VI: Binary star interactions

- H. Van Winckel, A. Jorissen, N. Gorlova, T. Dermine, K. Exter, T. Masseron, R. Østensen, S. Van Eck, and G. Van de Steene
Post-AGB binaries in an evolutionary perspective: a HERMES monitoring programme 1022
- E. van Aarle, P. Wood, T. Lloyd Evans, H. Van Winckel and T. Ueta
Optically bright Post-AGB stars in the LMC: an extensive sample study 1028
- R. G. Izzard, R. P. Church and T. Dermine
White dwarf kicks and implications for barium stars 1034
- I. Domínguez, L. Piersanti, R. Cabezón, O. Zamora, D. García-Senz, C. Abia and O. Straniero
The elusive nature of the R stars 1039
- H. B. Lau, O. de Marco, and X. W. Liu
Abell 58 – a Planetary Nebula with an ONe-rich knot: a signature of binary interaction? 1045

- C. A. Tout, D. T. Wickramasinghe, J. Liebert, L. Ferrario, J. E. Pringle and A. T. Potter
The origin of high magnetic fields in white dwarfs 1051

Session VII: Mixing processes in stellar interiors

- G. C. Angelou, J. C. attanzio, R. P. Church, and R. J. Stancliffe
Observational constraints for $\delta\mu$ mixing 1057

- R. J. Stancliffe
Mixing processes in carbon-enhanced metal-poor stars 1064

- M. Busso, S. Palmerini and E. Maiorca
Deep mixing at variable speed in stars: is thermohaline diffusion sufficient? 1070

Session VIII: Stellar atmospheres

- D. Kamath, P. R. Wood, I. Soszyński, and T. Lebzelter
Pulsation of AGB stars in the Small Magellanic Cloud cluster NGC 419 1078

- E. Lagadec
The effect of metallicity on the mass-loss from AGB stars: an observer's point of view 1083

Session IX: Poster contributions

- L. Stanford, G. S. Da Costa, and J. E. Norris
Abundances of the Star ROA 276 in ω Cen 1090

- S. Bisterzo and S. Cristallo
Low-metallicity AGB models: the H profile in the ^{13}C -pocket and the effect on the s-process 1095
