

## Steady jets and transient jets.

Characteristics and relationship

*Bonn, 7-8 April 2010*

*editors: M. Massi and A. Lobanov*

## TABLE OF CONTENTS

<i>Index</i>	5
<i>Foreword</i>	8
<i>List of participants</i>	11
<b>Session I: Jet observations</b>	
F. Mirabel <i>Microquasars</i>	14
M. Massi <i>Steady jets and transient jets: observational characteristics and models</i>	24
A. Lobanov <i>Quasi-stationary and transient patterns in jets</i>	33
R. Spencer and A. Rushton <i>Radio and X-rays from GRS1915+105 - close correlations of the third kind</i>	41
Z. Meliani <i>Decelerating relativistic two-component jets and the Fanaroff-Riley dichotomy</i>	46
M. Orienti and D. Dallacasa <i>Proper motion and apparent contraction in the CSO J0650+6001</i>	51
M. Orienti <i>Radio properties of steep-spectrum and flat-spectrum Seyfert nuclei</i>	56
C. Villforth, K. Nilsson, J. Heidt and T. Pursimo <i>Variability and stability in optical blazar jets</i>	60
C. M. Fromm, E. Ros, T. Savolainen, M. Perucho, A. P. Lobanov and J.A. Zensus <i>The 2006 radio flare in the jet of CTA102</i>	65

E. Liuzzo, G. Giovannini, M. Giroletti and G. B. Taylor <i>Parsec scale jets in brightest cluster galaxies</i>	69
A. Chuprikov and I. Guirin <i>V4641 Sgr and KV UMa. Two black hole candidates</i>	73
M. Massi <i>The two peak model of LS I +61303: radio spectral index analysis</i>	77
L. Zimmermann and M. Massi <i>The puzzling varying radio structure of LS I +61303</i>	82
Z. B. Zhang <i>On the prompt <math>\gamma</math>-ray emission radii of LGRBs</i>	87
D. Kunneriath, A. Eckart, M. Zamaninasab, G. Witzel, M. Valencia-S, N. Sabha and M. Garcia-Marin <i>Flare emission from Sagittarius A*</i>	91

## **Session II: MHD STEADY JET PRODUCTION AND SHOCK-IN-JET THEORY**

S. Komissarov <i>Magnetic acceleration of relativistic jets</i>	95
M. Turler <i>Shock-in-jet model for quasars and microquasars</i>	104
C. Fendt <i>Formation of MHD jets: flares as trigger of internal shocks</i>	112
E. Striani <i>New evidence for extreme particle acceleration in microquasars</i>	120
O Porth <i>Simulations and synchrotron radiation from the relativistic jet base</i>	125
J. Tammi <i>Flare-like outbursts from loading of the jets?</i>	129
B. Reville and J.G.Kirk <i>Radiative signatures of Fermi acceleration at relativistic shocks</i>	133
A. Vlasov, H.J. van Eerten, Z. Meliani, R. Keppens <i>Two shell collisions in the GRB afterglow phase</i>	137
C. S. Chang, E. Ros, Y. Y. Kovalev and M. L. Lister <i>A multi-band flare in the M87 jet 80 pc away from the central engine</i>	141
M. Massi and G. Poletto <i>Astrophysical jets: what can we Learn from solar ejections?</i>	145

F. Zuccarello, S.L. Guglielmino and P. Romano <i>Magnetic reconnection signatures in the solar atmosphere: results from multi-wavelength observations</i>	149
W. Vlemming and G. Surcis <i>Magnetic fields along massive protostellar jets. The case of W75N &amp; Cepheus A</i>	154
K. Qiu and S. Leurini <i>Molecular outflows from young stellar objects</i>	158
A. Oklopčič, V. Smolčić, S. Giodini, G. Zamorani, L. Birzan, E. Schinnerer, C. L. Carilli, A. Finoguenov, S. Lilly, A. Koekemoer and N. Z. Scoville <i>A wide-angle tail galaxy at <math>z = 0.53</math> in the COSMOS field</i>	161
A. Volvach and M.G. Larionov <i>Interpretation of the development of flare phenomena 2004-2007 in the blazar 3C 454.3</i>	165
<b>Session III: JETS AND HIGH-ENERGY EMISSION</b>	
K. Katarzynski <i>Correlation between X-Ray and <math>\gamma</math>-ray emission in TeV blazars</i>	168
J. M. Paredes <i>Radio jets and high energy emission in microquasars</i>	174
V. Bosch-Ramon <i>Spectral energy distribution of <math>\gamma</math>-ray binaries</i>	182
A. Pushkarev, Y.Y. Kovalev, M.L. Lister and T. Savolainen <i>Opening angles of parsec-scale AGN jets</i>	190
M. Georganopoulos, E. T. Meyer, G. Fossati and M. L. Lister <i>Are relativistic jets monoparametric engines?</i>	192
