

Non-thermal phenomena in colliding galaxy clusters*Nice, November 15-18, 2010**editors: C. Ferrari, M. Brüggen, G. Brunetti and T. Venturi***TABLE OF CONTENTS**

<i>Index</i>	471
<i>Foreword</i>	475
<i>List of Participants</i>	477
Talks	
I. Zhuravleva <i>Gas turbulent motions in galaxy clusters</i>	481
T. Mroczkowski, M. J. Devlin, S. R. Dicker, P. M. Korngut, B. S. Mason, E. D. Reese, C. Sarazin, J. Sievers, M. Sun and A. Young <i>New high-resolution Sunyaev–Zel’dovich observations with GBT+MUSTANG</i>	485
J. S. Sanders <i>Measuring turbulence in clusters with XMM-Newton RGS</i>	489
P. Mazzotta, H. Bourdin, S. Giacintucci, M. Markevitch and T. Venturi <i>Study of the M shock wave propagation in RXJ1314.4–2515</i>	495
T. Venturi <i>Observational properties of diffuse radio sources in galaxy clusters – Current knowledge and open questions</i>	499
M. Murgia <i>The magnetic field power spectrum in galaxy clusters from observations of polar- ized radio sources</i>	507
G. Brunetti <i>Cosmic rays and diffuse non-thermal emission in galaxy clusters: an introduction</i>	515
D. Wik <i>BAT search for non-thermal emission in HIFLUGCS clusters</i>	523

D. Eckert	
<i>Hard X-ray emission from galaxy clusters observed with INTEGRAL</i>	527
R. Cassano	
<i>Radio halos, cluster mergers and the role of future LOFAR observations</i>	531
M. Rossetti, B. M. Cavalleri, S. Molendi, F. Gastaldello, S. Ghizzardi and D. Eckert	
<i>A radio approach to the cool core – non cool core dichotomy</i>	537
S. Giacintucci	
<i>Diffuse radio sources in colliding galaxy clusters – Low frequency follow up of the GMRT Radio Halo Survey</i>	541
T. E. Clarke, T. Enßlin, A. Finoguenov, H. Intema, C. Pfrommer, R. van Weeren, H. Röttgering and R. Oonk	
<i>The curious case of Abell 2256</i>	547
L. Rudnick, S. Brown and D. Farnsworth	
<i>Shocking news outside of cluster cores</i>	551
G. Macario, T. Venturi, D. Dallacasa, S. Giacintucci, G. Brunetti, R. Cassano, C. H. Ishwara-Chandra and R. Athreya	
<i>GMRT 150 MHz follow up of diffuse steep spectrum radio emission in galaxy clusters</i>	557
J. Bagchi, R. J. van Weeren, S. Raychaudhury, H. J. A. Röttgering, H. T. Intema, F. Miniati, T. A. Enßlin, M. Markevitch and T. Erben	
<i>A deep radio and X-ray view of cluster formation at the crossroads of filaments</i>	561
R. F. Pizzo, A. G. de Bruyn, G. Bernardi and M. A. Brentjens	
<i>The galaxy cluster Abell 2255 and the origin of its radio halo</i>	565
R. J. van Weeren, H. T. Intema, H. J. A. Röttgering, M. Brüggen and M. Hoeft	
<i>Low-frequency radio observations of the galaxy cluster CIZA J2242.8+5301</i>	569
L. Bîrzan, D. A. Rafferty, B. R. McNamara, P. E. J. Nulsen and M. W. Wise	
<i>AGN heating in complete samples of galaxy clusters</i>	573
D. A. Rafferty, L. Bîrzan, B. R. McNamara, M. W. Wise and P. E. J. Nulsen	
<i>The AGN outburst and merger in HCG 62</i>	577
D. Ryu and H. Kang	
<i>Simulation of the large scale structure of the Universe: shock waves and nonthermal effects</i>	581
T. W. Jones, D. H. Porter, D. Ryu and J. Cho	
<i>Cluster turbulence: simulation insights</i>	588
D. Nagai	
<i>Modeling the outskirts of galaxy clusters with cosmological simulations</i>	594

C. Pfrommer, T. Enßlin, F. Miniati and K. Subramanian <i>Cosmic ray transport in galaxy clusters: implications for radio halos and gamma-rays</i>	598
L. Iapichino <i>Turbulent flow and stirring mechanisms in the cosmological large-scale structure</i>	605
F. Vazza <i>Merger and non-merger galaxy clusters in cosmological AMR simulations</i>	609
J. O. Burns and S. W. Skillman <i>Cosmological numerical simulations of radio relics in galaxy clusters: Insights for future observations</i>	615
S. Paul, L. Iapichino, F. Miniati, J. Bagchi and K. Mannheim <i>Evolution of shocks and turbulence in the formation of galaxy clusters embedded in Megaparsec-scale filaments</i>	619
J. Donnert, K. Dolag, R. Cassano and G. Brunetti <i>Simulating cosmic rays in turbulent galaxy clusters</i>	623
M. Brüggen, R. J. van Weeren and H. J. A. Röttgering <i>Magnetic fields and shock waves in cluster outskirts</i>	627
J. ZuHone, M. Markevitch and G. Brunetti <i>Testing the connection between radio mini-halos and core gas sloshing with MHD simulations</i>	632
A. Lazarian and G. Brunetti <i>Turbulence, reconnection and cosmic rays in galaxy clusters</i>	636
H. Kang and D. Ryu <i>Cosmic ray acceleration at weak cosmological shocks in test-particle regime</i>	648
A. Bonafede, F. Govoni, L. Feretti, M. Murgia, G. Giovannini and M. Brüggen <i>Magnetic field in galaxy clusters from depolarization of radio sources</i>	654
V. Vacca, M. Murgia, F. Govoni, L. Feretti, G. Giovannini, R. A. Perley and G. B. Taylor <i>The intra-cluster magnetic field power spectrum in Abell 2199</i>	658
Posters	
R. E. A. Canning, H. R. Russell, A. C. Fabian, C. S. Crawford and N. A. Hatch <i>Abell 2146: riding the wake of a merging galaxy cluster</i>	662
