

## Varying fundamental constants and dynamical dark energy

*Sesto, Val Pusteria (BZ), 8-13th July 2013*

*editors: Carlos Martins and Paolo Molaro*

### TABLE OF CONTENTS

<i>Index</i>	5
<i>Foreword</i>	7
<i>List of Participants</i>	11
C. J. A. P. Martins, M. C. Ferreira, M. D. Julião, A. C. O. Leite, A. M. R. V. L. Monteiro, P. O. J. Pedrosa and P. E. Vielzeuf <i>Fundamental cosmology in the E-ELT era</i>	13
R. I. Thompson <i>Confronting cosmology and new physics with fundamental constants</i>	20
P. Brax <i>A gentle introduction to modified gravity</i>	26
L. Kraiselburd, S. Landau, M. Salgado and D. Sudarsky <i>Equivalence principle in Chameleon models</i>	32
G. Gubitosi <i>Disformal coupling, CMB spectral distortion and distance duality relation</i>	38
M.P. Dabrowski, K. Marosek, and A. Balcerzak <i>Standard and exotic singularities regularized by varying constants</i>	44
S. Bonometto <i>Fluctuations in strongly coupled cosmologies &amp; fundamental constant variations</i>	50
J. K. Webb, A. Wright, F. E. Koch and M. T. Murphy <i>Enhanced heavy magnesium isotopes in quasar absorption systems and varying alpha</i>	57
J. B. Whitmore, P. Molaro, M. Centurion, H. Rahmani, T. M. Evans, M. T. Murphy, I. I. Agafonova, P. Bonifacio, S. D'Odorico, S. A. Levshakov, S. Lopez, C. J. A. P. Martins, P. Petitjean, D. Reimers, R. Srianand, G. Vladilo and M. Wendt <i>Bounds on a change in <math>\alpha</math> towards quasar HE 2217-2818</i>	63

H. Rahmani, M. Wendt, R. Srianand, P. Noterdaeme, P. Petitjean, P. Molaro, J. B. Whitmore, M. T. Murphy, M. Centurion, H. Fathivavsari, S. D’Odorico, T.M. Evans, S. A. Levshakov, S. Lopez, C. J. A. P. Martins, D. Reimers and G. Vladilo <i>The UVES Large Program for testing fundamental physics II: constraints <math>\Delta\mu/\mu</math> towards quasar HE 0027 – 1836</i>	70
M. Wendt and P. Molaro <i>Constraints of <math>\Delta\mu/\mu</math> based on <math>H_2</math> observations in QSO spectra</i>	78
H. Rahmani, D. Albornoz Vásquez, R. Srianand, P. Petitjean, P. Noterdaeme and C. Ledoux <i>Probing <math>\mu</math> with <math>H_2</math> absorption lines at <math>z_{\text{abs}} \approx 2.66</math> toward Q J 0643-5041 with VLT-UVES</i>	84
S. A. Levshakov, C. Henkel, D. Reimers and P. Molaro <i>Limits on the space-time variations of fundamental constants</i>	90
E. Cameron and A. N. Pettitt <i>A bayesian reanalysis of the quasar dataset</i>	96
L. Kraiselburd <i>A statistical analysis of varying <math>\alpha</math> data</i>	102
M. D. Julião, M. C. Ferreira, C. J. A. P. Martins and A. M. R. V. L. Monteiro <i>Probing unification scenarios with atomic clocks</i>	108
A. M. R. V. L. Monteiro, M. C. Ferreira, M. D. Julião and C. J. A. P. Martins <i>Constraining fundamental physics with combined variations of fundamental constants</i>	113
E. García-Berro, S. Torres, L. G. Althaus, A. H. Córscico, P. Lorén-Aguilar, A. D. Romero and J. Isern <i>White dwarf constraints on a varying <math>G</math></i>	118
A. Coc and E. Vangioni <i>The triple-alpha reaction and the <math>A=8</math> gap in BBN and Population III stars</i>	124
S. Galli <i>Clusters of galaxies and variation of the fine structure constant</i>	130
E. Menegoni, M. Martinelli, S. Galli and A. Melchiorri <i>Constraints on fundamental constants with galaxy surveys</i>	136
M. Martinelli, S. Pandolfi, E. Calabrese, V. F. Cardone, C. J. A. P. Martins, S. Spiro and P. E. Vielzeuf <i>Constraints on varying alpha with future low-medium redshift probes</i>	143
P. O. J. Pedrosa, A. C. O. Leite and C. J. A. P. Martins <i>Observational strategies for varying constants with ESPRESSO and ELT-HIRES</i>	149
P. Vielzeuf and C. J. A. P. Martins <i>Varying constants and dark energy with the E-ELT</i>	155
