MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA
Vol.88 n.4 2017

Francesco's legacy: star formation in space and time

Firenze, June 5–9, 2017

editors: R. Cesaroni, E. Corbelli and D. Galli

TABLE OF CONTENTS

Index 475

Foreword 484

List of Participants 488

Conference pictures 497

S. Stahler
A long friendship 503

G. Melnick and T. Montmerle
Francesco's memories 506

P. Boncinelli and L. Casetti
Francesco's legacy in education and outreach 509

The Evolution of Molecular Clouds

P. Hennebelle
Molecular cloud formation, turbulence and feedback 513

Ph., André, V. Könyves, D. Arzoumanian and A. Roy
Molecular filaments and the origin of the IMF 521

S. Basu and S. Auddy
From molecular clouds to the IMF: spatial and temporal effects 524

J. Braine
Properties, rotation of molecular clouds in M 33 530

A. Burkert
A bathtub model for the star-forming interstellar medium 533

P. Caselli
Our astrochemical heritage 536

E. Corbelli
The lifecycle of molecular clouds and the extragalactic side of Francesco 544

C. L. Dobbs
Comparing the evolution of clouds and clusters in spiral galaxies 547

F. Fontani, B. Commerçon, A. Giannetti, M.T. Beltrán,A. Sánchez-Monge and L. Testi
Fragmentation of massive dense cores: the role of the magnetic field 551

S. Inutsuka
An origin of accelerating star formation 554

P. M. Koch, Y.-W. Tang, N.L. Chapman, A. Duarte-Cabral, P. T. P. Ho, G. Novak, N. Peretto, Y.-N. Su, S. Takakuwa and H.-W. Yen
Magnetic fields from filaments to cores 557

K. M. Menten
Francesco and masers 560

S.E. Ragan
The role of spiral arms in Milky Way star formation 565

V. M. Rivilla
The formation of prebiotic molecules in star-forming regions 568

K. Tomisaka
Magnetohydrostatic structures of magnetically-supported filaments and their stability 571

Protostellar and Pre-Main Sequence Evolution

F. D'Antona
From protostellar to pre-main-sequence evolution 574

M. T. Beltrán and W. J. de Wit"
Accretion disks in luminous young stellar objects 581

H. Beuther, A. Ahmadi, J. Mottram, F. Bosco, H. Linz, P. Klaassen and the CORE team"
CORE: fragmentation and disk formation in high-mass star formation 584

J. Bouvier
The early evolution of solar-type stars: accretion, magnetism, and star-disk interaction 587

S. Lizano and C. Tapia
Structure and emission of magnetized accretion disks 593

M. Marconi and V. Ripepi
Pulsation in Herbig stars: an idea of Francesco and its realization 597

S. T. Megeath
Protostars in time and space: results from the Herschel Orion protostar survey 602

R. D. Oudmaijer, K. M. Ababakr and J. R. Fairlamb
The formation and evolution of Herbig Ae/Be stars 605

M. Padovani, A. Marcowith, P. Hennebelle and K. Ferrière
Protostars as cosmic-ray factories 608

B. Reipurth
Dynamical evolution of young binaries and multiple systems 611

S. Stahler
EXors and the stellar birthline 616

M. Tafalla
The jet-outflow connection: new results from ALMA 619

E. Tognelli, P. G. Prada Moroni and S. Degl'Innocenti
Planet ingestion on a pre-MS star 624

E. I. Vorobyov , V. Elbakyan , T. Hosokawa , Y. Sakurai, M. Guedel and H. Yorke
Pre-main-sequence evolution of low-mass stars and brown dwarfs with accretion 627

Young Stellar Clusters

L. A. Hillenbrand
Infant stars behave like teenagers 630

R. D. Jeffries
Ages and age spreads in young stellar clusters 637

R. I. Klein
Multi-physics, multi-scale simulations of star formation: from large scale (1 kpc) turbulent magnetized Galactic disk to stellar clusters 642

M. Messa and the LEGUS team
Dissecting the star cluster population in M51 The LEGUS view 645

S. F. Portegies Zwart and F. Concha-Ramírez
The size-evolution of circumstellar disks in the Trapezium cluster 648

T. Prusti
Gaia view on young stellar clusters 656

G. G. Sacco, S. Randich, L. Bravi, R. Jeffries and E. Rigliaco
Kinematics of young star clusters with the Gaia-ESO Survey 660

L. Spina
The metal content of pre-main sequence clusters 663

E. Zari and A. G. A. Brown
Mapping young stellar populations towards Orion with Gaia DR1 668

The First Stars

V. Bromm
The first stars: our evolving theoretical picture 671

D. Galli
My chemistry with Francesco 678

S. C. O. Glover
The dynamics of ionization and dissociation fronts in extremely dense primordial gas 682

D. Hollenbach
The effect of photoevaporation on the first stars 685

T. Hosokawa
Formation of massive primordial stars controlled by the protostellar evolution 689

P. Molaro
The most metal poor stars 692

K. Omukai
Francesco's legacy in primordial star formation studies 697

A. T. P. Schauer, S. C. O. Glover and R. S. Klessen
The impact of streaming velocities: delaying the formation of the first stars 702

D. R. G. Schleicher, S. Bovino, B. Körtgen, T. Grassi and R. Banerjee
Astrochemistry: from primordial gas to present-day clouds 705

R. Schneider
Bridging the near and the far: constraints on first star formation from stellar archaeology 708

Concluding Remarks

H. Zinnecker
My friend Francesco Palla 713

POSTER SESSION

The Evolution of Molecular Clouds

J. Abreu–Vicente
Combining Planck and Herschel to improve our view of the Milky Way 718

D. Arzoumanian, Y. Shimajiri, A. Roy, Ph. André, V. Könyves and A. Bracco
Observed properties of a filament system in the Orion B molecular cloud 720

M. Benedettini, S. Molinari, A. Baldeschi, M. T. Beltran, J. Brand, R. Cesaroni, D. Elia, F. Fontani, M. Merello, L. Olmi, S. Pezzuto, K. L. J. Rygl, E. Schisano, L. Testi and A. Traficante
The Forgotten Quadrant Survey 722

A. Chacón-Tanarro, P. Caselli, L. Bizzocchi, J. E. Pineda, S. Spezzano, B. M. Giuliano, V. Lattanzi and A. Punanova
Deuterated methanol map towards L1544 724

R.-A. Chira, J. Kainulainen, J. C. Ibáñez-Mejía, Th. Henning and M.-M. Mac Low
Fragmenting filaments in simulations 726

L. Colzi, F. Fontani, V. M. Rivilla, A. Sánchez-Monge, L. Testi, M. Beltrán and P. Caselli
Nitrogen fractionation in high-mass star forming cores and its Galactic trend 728

Y. Contreras and P. Sanhueza
Initial gas structure in a cold, massive clump: cluster formation in its earliest stages 731

P. Di Cintio, S. Gupta and L. Casetti
Non-thermal states in models of filaments: a dynamical study 733

A. Giannetti, S. Leurini, F. Wyrowski, J. Urquhart, C. König, T. Csengeri, R. Güsten and K. M. Menten
Evolution of high-mass star-forming regions 735

B. Hasenberger, M. Lombardi, J. Alves, J. Forbrich, A. Hacar and C. J. Lada
Towards a physically motivated core definition: the Pipe Nebula as seen in Herschel-Planck emission and NIR extinction 737

S. A. Khoperskov, E. O. Vasiliev and S. S. Khrapov
GMCs in galactic scale simulations 739

M. I. N. Kobayashi, S. Inutsuka, H. Kobayashi and K. Hasegawa
Time evolution of giant molecular cloud mass functions with cloud-cloud collisions and gas resurrection in various environments 741

A. López-Sepulcre, F. Fontani, R. Neri, C. Favre, C. Ceccarelli, P. Caselli and the SOLIS team
OMC-2FIR4: a laboratory to study the formation environment of the Solar System 743

S. Ohashi, P. Sanhueza, T. Hirota, M. Choi, Q. Nguyễn-Lu'o'ng and K. Tatematsu
Multiple star formation of a starless core in the Orion A cloud 745

P. Palmeirim, A. Zavagno, D. Elia and the VIALACTEA team
Star formation and ionized regions throughout the inner Galactic plane 747

J. Schober, D. R. G. Schleicher and R. S. Klessen
Tracing star formation with radio emission 749

C. Toci and D. Galli
Polytropic models of filamentary molecular clouds: structure, stability and magnetic fields 751

R. G. Tress, M. C.Sormani , R. S. Klessen and S. C. O. Glover
A simple way to convert sink particles into stars 753

K. Uehara, M. Tsuboi, Y. Kitamura, R. Miyawaki and A. Miyazaki
ALMA view of the massive dense clump in the Galactic center 50 km s^{-1} molecular cloud 755

Y. Wang, H. Beuther, S. Bihr, M. Rugel, K. G. Johnston and the THOR team
The Galactic ionized gas seen with THOR 757

Protostellar and Pre-Main Sequence Evolution

P. Abrahám, J. Varga, K. 'E. Gabányi, L. Chen, A. Kóspál, Th. Ratzka, R. van Boekel, L. Mosoni and Th. Henning
Mid-infrared interferometric variability of DGTau: implications for the inner-disk structure 759

C. Agurto-Gangas, J. E. Pineda, L. Testi, P. Caselli, L. Szűcs, M. Tazzari, M. Dunham, I. W. Stephens and A. Miotello
Grain growth in Class I protostar Per-emb-50: a dust continuum analysis with NOEMA & SMA 761

A. Ahmadi, H. Beuther, J.C. Mottram, F. Bosco and the CORE Team
Disk properties in high-mass star formation 763

R. M. G. de Albuquerque, V. Cayatte, J. F. Gameiro, J. J. G. Lima and C. Sauty
Unveiling YSO dynamics through observations and simulations 765

F. Bacciotti, U. Locatelli, M. Volpi, R.I. Páez, and L. Podio
Exploring the feedback of asymmetric jets on the orbital motions in protoplanetary disks 767

E. Bianchi, C. Codella, C. Ceccarelli, F. Fontani, L. Testi, R. Bachiller, B. Lefloch, L. Podio and V. Taquet
How organics deuteration changes during the formation of a Sun-like star 769

E. Cahill, E. T. Whelan, N. Huélamo, J. M. Alcalá and B. Rouzé
Spectro astrometry of the Hα emission of T Cha 771

A. Caratti o Garatti, R. Cesaroni, L. Moscadelli, B. Stecklum, A. Sanna, R. Garcia Lopez, T. Ray, J. Eislöffel, R. Oudmaijer, W.-J. de Wit and C.M. Walmsley
First disk-mediated accretion burst from a massive protostar 773

D. Coffey, F. Bacciotti, L. Podio and J. Erkal
The near-UV: the true window on jet rotation 775

C. Contreras Peña, P. W. Lucas, D. Minniti, R. Kurtev and J. Borissova
Eruptive variable protostars from VVV 777

W. J. deWit, M. Beltrán, A. Caratti o Garatti, S. Kraus, R. Oudmaijer and P. Boley
Accretion-ejection in massive YSOs 779

N. Dylan Kee, S. Owocki, R. Kuiper and J. Sundqvist
Line-driven ablation of circumstellar disks 781

E. Fiorellino, S. Pezzuto, S. J. Liu, M. Benedettini, E. Schisano, D. Elia, P. André, V. Könyves, B. Ladjelate and the Herschel Gould Belt Survey Consortium
A study of the cold cores population in the Serpens star-forming region 783

L. Haemmerlé, P. Eggenberger, G. Meynet, A. Maeder, C. Charbonnel and R. S. Klessen
Massive star formation by accretion: how to circumvent the angular momentum barrier? 785

M. Jung and R. Banerjee
Simulations of the early phases of protostellar disc evolution with radiation transfer 787

J. S. Kim, M. Fang, C.J. Clarke, S. Facchini, I. Pascucci, D. Apai and J. Bally
Young stellar objects & photoevaporating protoplanetary disks in the Orion's sibling NGC 1977 790

A. Kölligan and R. Kuiper
From accretion to outflows of massive protostars 793

M. Kunitomo, T. Guillot, T. Takeuchi and S. Ida
Revisiting the pre-main sequence evolution of stars: importance of accretion efficiency and deuterium abundance 795

F. Lopez-Martinez and J. F. Gameiro
Connection between the accretion and outflow processes in T Tauri stars 797

J. C. Mottram, H. Beuther, A. Ahmadi, F. Bosco and the CORE Team
CORE: linking sites of high-mass star formation with their surroundings 799

A. Murphy, E. Whelan, F. Bacciotti, C. Dougados, T. Ray, D. Coffey, J. Alcalá, P. Garcia, F. Comerón and J. Eislöffel
A combined MUSE / X-Shooter study of the TH28 Jet 801

H. Nagahara and K. Ozawa
The role of initial protostellar disk size on the chemical evolution of the disk 804

S. Pezzuto, E. Fiorellino, M. Benedettini, E. Schisano, D. Elia, P. André, V. Könyves, B. Ladjelate, J. Di Francesco, L. Piccotti and the Herschel Gould Belt Survey Consortium
A study of the cold cores population in the Perseus star-forming regions 806

A. Postel, M. Audard, E. Vorobyov, C. Rab, O. Dionatos and M. Güdel
A Herschel survey of outbursting sources 808

E. Redaelli, F. O. Alves, P. Caselli, J. E. Pineda and the GAS team
The dynamics of a young protostellar core 810

P. Sanhueza
The formation of high-mass binary systems by core/disk fragmentation: very early results 812

A. Sanna, L. Moscadelli, R. Cesaroni, A. Caratti o Garatti, K. M. Menten, A. Kölligan and R. Kuiper
ALMA observations towards G023.01−00.41 814

C. Sauty, V. Cayatte, K. Tsinganos, J. J. G. Lima, R. M. G. de Albuquerque and J. F. Gameiro
Accretion and jet simulations in YSOs 816

S. Skinner, M. Audard, M. Güdel and C. Schneider
HST & Chandra observations of the RY Tau jet 818

B. Tofflemire, R. Mathieu, G. Herczeg, D. Ardila, R. Akeson, D. Ciardi and C. Johns-Krull
Accretion dynamics in pre-main sequence binaries 820

K. Tomida, M. N. Machida, T. Hosokawa, Y. Sakurai and C. H. Lin
Grand design spiral arms in a young forming circumstellar disk 822

M. Vioque R. D. Oudmaijer and D. Baines
HR diagram of Herbig Ae/Be stars and their infrared excesses 824

Young Stellar Clusters

E. J. Alfaro M. T. Costado M. González A. J. Delgado and the GES consortium
Phase-space structure in the Monoceros region: radial velocities and TGAS data 826

K. Biazzo, A. Frasca, J. M. Alcalá, M. Zusi, E. Covino, S. Randich, M. Esposito, C. F. Manara, S. Antoniucci, B. Nisini, E. Rigliaco, F. Getman and L. Spina
Elemental abundances in star-forming regions. Results in Lupus and future analysis in Orion 828

L. Bravi
The Gaia-ESO Survey: kinematical and dynamical study of four young open clusters 830

N. Kaltcheva, G. Topasna and V. Golev
Strömgren-Hβ photometry and optical polarization study of young open clusters 832

R. E. Miura, D. Espada, K. Nakanishi, A. Hirota and H. Sugai
Super-star-cluster forming clouds in the young starburst galaxy NGC5253 834

R. J. Parker
The initial conditions of star formation from spatio-kinematics 836

A. Pérez-Blanco, R. D. Oudmaijer and D. Baines
The clustering properties of intermediate mass young stars 838

I. Pillitteri, S. J. Wolk and S. T. Megeath
Ages and distances to star forming regions from the synergy of X-rays and IR observations 840

B. Shukirgaliyev, G. Parmentier, A. Just and P. Berczik
Impact of a star-formation efficiency profile on the evolution of open clusters 842

G. Suárez, C. Román-Zúñiga and J. J. Downes
Photometric determination of the system IMF of the 25 Orionis stellar group 844

K. Vaidya, S. Bhattacharya, V. Panwar, M. Samal, W.-P. Chen and D. K. Ojha
Star formation toward IRAS 10427-6032 846

L. Venuti, L. Prisinzano, G. Sacco, E. Flaccomio, R. Bonito, F. Damiani, G. Micela, M. Guarcello, GES Collaboration and CSI2264 Collaboration
Age spread and sequential star formation in the young cluster NGC 2264 848

N. J. Wright
OB associations are not the expanded remnants of star clusters 850

S. A. Zhekov
X-rays from young clusters reveal binarity of massive stars 852

The First Stars

K. Bach and H.-W. Lee
Accurate determination of radiation damped profiles in the reionization epoch 854

G. Chiaki, H. Susa and S. Hirano
Formation environment of Pop II stars affected by the feedbacks from Pop III stars 856

L. Graziani, M. de Bennassuti and R. Schneider
Star formation in Milky Way progenitors 858

K. Sugimura, C. M. Coppola, K. Omukai, D. Galli and F. Palla
Supermassive star formation with non-LTE primordial-gas chemistry 860

H. Susa, S. Tanaka, G. Chiaki and N. Tominaga
Stellar wind prevents the ISM gas from accreting onto the PopIII stars 862

K. M. J. Wollenberg, S. C. O. Glover, V. Bromm and R. S. Klessen
Stabilizing Population III accretion disks with magnetic fields 864

AFTERWORD

P. Tozzi
Francesco's last divertissement: the Little Prince's Universe 866
